

Description

The AP2132 series are positive voltage regulator ICs fabricated by CMOS process. The ICs consist of a voltage reference, an error amplifier, a power transistor, a resistor network for setting output voltage, a current limit circuit for current protection, and a chip enable circuit.

The AP2132 have features of large current, low dropout voltage, high output voltage accuracy, and low input voltage. The AP2132 provide a power good (PG) signal to indicate if the voltage level of V_{OUT} reaches 92% of its rating value. And it operates with a V_{IN} as low as 1.4V and V_{PP} voltage 5V with output voltage programmable as low as 0.6V.

The AP2132 ADJ pin is unique as it has two specific modes.

Internal Mode:

The ADJ pin is grounded the internal resistors are used and the output voltages can be 1.2V, 1.5V, 1.8V, or 2.5V as ordered by a specific part number.

External Mode:

The ADJ pin is not grounded but connected to an external resistor divider. In this mode the device is truly adjustable and the internal resistors are ignored. This is true for all of the versions.

The AP2132 are available in 1.2V, 1.5V, 1.8V, 2.5V fixed output voltage versions and adjustable output voltage version. The fixed versions integrate the adjust resistors. It is also available in an adjustable version, which can set the output voltage with external resistor. If the pin of adjustable output voltage is to ground, it will switch to fixed output voltage.

The AP2132 series are available in PSOP-8 package.

Applications

- Notebook

- Notes:
1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) & 2015/863/EU (RoHS 3) compliant.
 2. See <https://www.diodes.com/quality/lead-free/> for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Pin Assignments

Features

- Adjustable Output: 0.6V to 3.0V
- Low Dropout Voltage: 300mV@ $I_{OUT} = 2A$, $V_{OUT} = 1.2V$
- Over Current and Over Temperature Protection
- Enable Pin
- PSOP-8 Package with Thermal Pad
- Maximum Output Current: 2A
- High Output Voltage Accuracy: 2%
- V_{OUT} Power Good Signal
- Excellent Line/Load Regulation
- Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- Halogen and Antimony Free. "Green" Device (Note 3)**
- For automotive applications requiring specific change control (i.e. parts qualified to AEC-Q100, PPAP capable, and manufactured in IATF 16949 certified facilities), please [contact us](#) or your local Diodes representative.**
- <https://www.diodes.com/quality/product-definitions/>

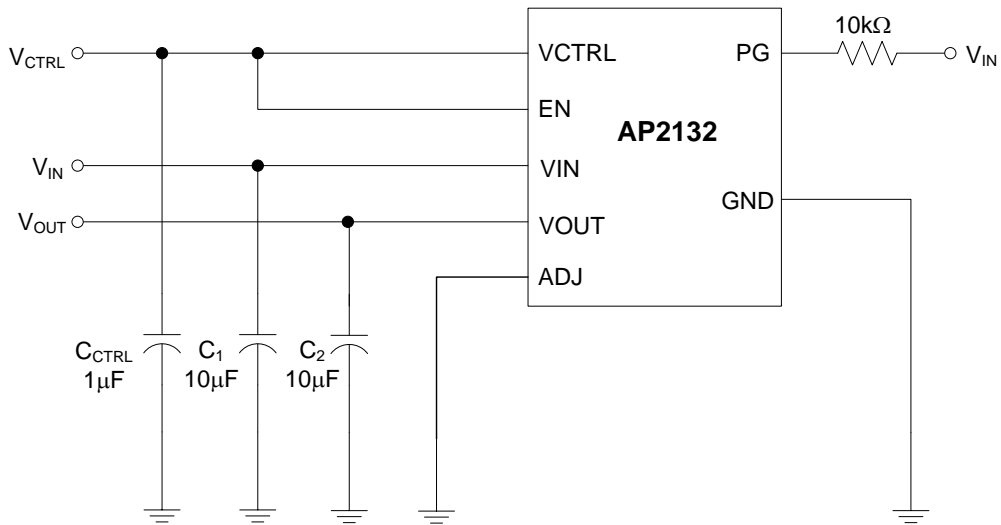

Typical Applications Circuit

$$V_{OUT} = \frac{0.6 (R1 + R2)}{R2}$$

Do not program below 0.6V

Typical Application of AP2132 for Adjustable Version

Typical Application of AP2132 for Fixed Version

Pin Description

Pin Number	Pin Name	Function
1	PG	Assert high once V_{OUT} reaches 92% of its rating voltage
2	EN	Enable input
3	VIN	Input voltage
4	VCTRL	Input voltage for controlling circuit
5	NC	Not connected
6	VOUT	Regulated output voltage
7	ADJ	Internal Mode ADJ is connected to ground. The output voltage is set by internal resistors External Mode ADJ is connected to external feedback resistors. The output voltage will be $V_{OUT} = 0.6 (R1+R2)/R2$. Do not program below 0.6V
8	GND	Ground
Thermal Pad	GND or Open	The pad may be grounded or left open. This does not replace the need for ground on Pin 8.

Functional Block Diagram

Absolute Maximum Ratings (Note 4)

Symbol	Parameter	Rating	Unit
V _{IN} V _{CTRL}	Input Voltage Input Voltage for Controlling Circuit	6.0	V
V _{EN}	Enable Input Voltage	-0.3 to 6.0	V
I _{OUT}	Output Current	2.5	A
θ _{JA}	Thermal Resistance (No Heatsink)	130	°C/W
T _J	Operating Junction Temperature	+150	°C
T _{STG}	Storage Temperature Range	-65 to +150	°C
T _{LEAD}	Lead Temperature (Soldering, 10sec)	+260	°C
—	ESD (Machine Model)	200	V
—	ESD (Human Body Model)	2000	V

Note 4: Stresses greater than those listed under “*Absolute Maximum Ratings*” can cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “*Recommended Operating Conditions*” is not implied. Exposure to “*Absolute Maximum Ratings*” for extended periods can affect device reliability.

Recommended Operating Conditions

Symbol	Parameter	Min	Max	Unit
V _{IN}	Input Voltage	1.4	5.5	V
V _{CTRL}	Input Voltage for Controlling Circuit	4.5	5.5	V
T _A	Operating Ambient Temperature Range	-40	+85	°C

Electrical Characteristics (@ $V_{IN} = V_{OUT} + 0.5V$, $V_{CTRL} = V_{EN} = 5V$, $T_A = +25^\circ C$, $C_{IN} = C_{OUT} = 10\mu F$, $C_{CTRL} = 1\mu F$, $I_{OUT} = 10mA$, **Bold** typeface applies $-40^\circ C \leq T_A \leq +85^\circ C$ unless otherwise specified.)

Symbol	Parameter	Conditions	Min	Typ	Max	Unit	
V_{OUT}	Output Voltage	$V_{IN} = V_{OUT} + 0.5V$, $I_{OUT} = 10mA$	$V_{OUT} \times 98\%$	—	$V_{OUT} \times 102\%$	V	
V_{IN}	Input Voltage	—	1.4	—	5.5	V

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
