

Infrared Receiver Control Receiver Module

IRM-36XXMF31 series

Features

- High protection ability against EMI
- Circular lens for improved reception characteristics
- Available for various carrier frequencies
- Min burst length: 6 cycles
- Min gap length: 10 cycles
- Suitable for continuous code
- Low operating voltage and low power consumption
- Optimized immunity against TFT backlight interferences
- High immunity against ambient light
- Long reception range
- High sensitivity
- Pb free and RoHS compliant

Description

The IRM-36xxMF31 series devices are miniature type infrared receivers which have been developed and designed by using the latest IC technology, specially optimized to suppress interferences from TFT backlight.

The photo diode and preamplifier are assembled onto a lead frame and molded into an epoxy package which operates as an IR filter.

The demodulated output signal can directly be decoded by a microprocessor.

Pin Configuration

1. OUT
2. GND
3. V_{CC}

Applications

- AV equipment such as TV, VCR, DVD, CD, MD, etc.
- Short pause time protocols
- Toy applications
- CATV set top boxes
- Multi-media Equipment
- Other devices using IR remote control

Application Circuit

The RC Filter must be connected as close as possible to Vcc and GND pins.

Test method

The specified electro-optical characteristics are valid under the following conditions.

1. Measurement environment
 - A place without extreme light reflections.
2. External light
 - The environment contains an ordinary, white fluorescent lamp without high frequency modulation. The color temperature is 2856K and the illumination at the IR receiver is less than 10 Lux ($E_v \leq 10\text{Lux}$).
3. Standard transmitter
 - The test transmitter is calibrated by using the circuit shown in figure 2. The radiation intensity of the transmitter is adjusted until $V_o=400\text{mVp-p}$. Both, the test transmitter and the photo diode, have a peak wavelength of 940nm. The photo diode for calibration is PD438B ($\lambda_p=940\text{nm}$, $V_r=5\text{V}$).
4. The measurement system is shown in Fig.-3
