FUZETEC TECHNOLOGY CO., LTD.	NO.	P	PQ35-101E			
Product Specification and Approval Sheet	Version	A6	Page	1/4		

Surface Mountable PTC Resettable Fuse: FSMD0603 Series

1. Summary

(a) RoHS Compliant & Halogen Free

(b) Applications: All high-density boards

(c) Product Features: Small surface mountable, Solid state, Faster time to trip than

standard SMD devices, Lower resistance than standard SMD devices

(d) Operation Current: 0.01A~0.25A (e) Maximum Voltage: 9V~60VDC

(f) Temperature Range : -40°C to 85°C

2. Agency Recognition

File No. E211981 UL: C-UL: File No. E211981 TÜV: File No. R50090556

3. Electrical Characteristics (23°℃)

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

Termination pad characteristics

Termination pad materials: Pure Tin

IT=Trip current-minimum current at which the device will always trip at 23℃ still air.

V MAX=Maximum voltage device can withstand without damage at it rated current.(I MAX)

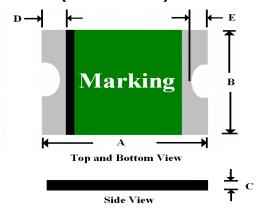

I MAX= Maximum fault current device can withstand without damage at rated voltage (V MAX).

Pd=Typical power dissipated-type amount of power dissipated by the device when in the tripped state in 23℃ still air environment.

R_{MIN}=Minimum device resistance at 23°C prior to tripping. R1_{MAX}=Maximum device resistance at 23°C measured 1 hour after tripping or reflow soldering of 260°C for 20 seconds.

- Warning: Each product should be carefully evaluated and tested for their suitability of application.
 - Operation beyond the specified maximum rating or improper use may result in damage and possible electrical arcing and/or flame. - PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged
 - - Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance. ₽
 - Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against
 - Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to

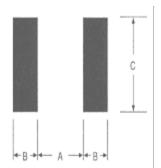

abnormal or failure conditions.

9. Pad Layouts . Solder Reflow and Rework Recommendations

The dimension in the table below provide the recommended pad layout for each FSMD0603 device

Pad dimensions (millimeters)						
Device	A Nominal	B Nominal	C Nominal			
FSMD0603 Series	0.80	0.60	0.80			

Profile Feature	Pb-Free Assembly
Average Ramp-Up Rate (Tsmax to Tp)	3 °C/second max.
Preheat :	
Temperature Min (Tsmin)	150 ℃
Temperature Max (Tsmax)	200 ℃
Time (tsmin to tsmax)	60-180 seconds
Time maintained above:	
Temperature(T _L)	217 ℃
Time (t _L)	60-150 seconds
Peak/Classification Temperature(Tp) :	260 ℃
Time within 5℃ of actual Peak :	
Temperature (tp)	20-40 seconds
Ramp-Down Rate :	6 °C/second max.
Time 25 ℃ to Peak Temperature :	8 minutes max.
-	•

Note 1: All temperatures refer to of the package, measured on the package body surface.

Solder reflow

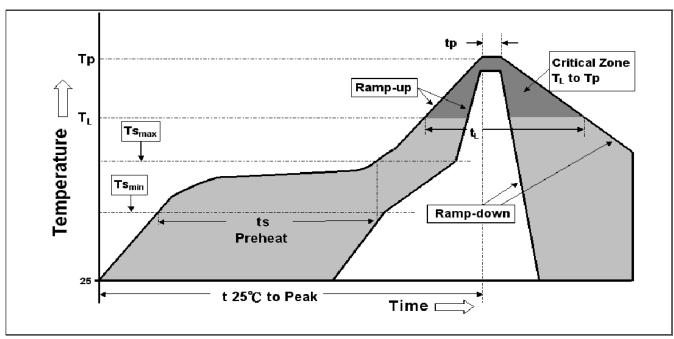

- Due to "Lead Free" nature, Temperature and Dwelling time for the soldering zone is higher than those for Regular. This may cause damage to other components.
- Recommended max paste thickness is 0.25mm.(Nominal)
- 2. Devices can be cleaned using standard methods and aqueous solvent.
- 3. Rework use standard industry practices.
- 4. Storage Envorinment : $< 30^{\circ}$ C / 60%RH Caution:

the performance requirements.

If reflow temperatures exceed the recommended profile, devices may not meet

2. Devices are not designed to be wave soldered to the bottom side of the board.
