Notes:

1. Device mounted on FR-4 substrate board, with minimum recommended pad layout, single side.
2. The power dissipation is limited by 150℃ junction temperature
3. Pulse Test : Pulse width≤300μs, duty cycle≤2%.
4. Guaranteed by design, not subject to production testing.
5. The data is theoretically the same as I_D, in real applications , should be limited by total power dissipation.
