

3-to-8 line decoder/demultiplexer

FEATURES

- Demultiplexing capability
- Multiple input enable for easy expansion
- Ideal for memory chip select decoding
- Active HIGH mutually exclusive outputs
- Output capability: standard
- ICC category: MSI

ORDERING INFORMATION

DEVICE	Package Type	MARKING	Packing	Packing Qty
74HC238N	DIP16	74HC238	TUBE	1000/box
74HC238M/TR	SOP16	74HC238	REEL	2500/reel
74HC238MT/TR	TSSOP16	HC238	REEL	2500/reel

GENERAL DESCRIPTION

The HC238 are high-speed Si-gate CMOS devices and are pin compatible with low power Schottky TTL (LSTTL). They are specified in compliance with JEDEC standard no. 7A.

The HC238 decoders accept three binary weighted address inputs (A0, A1, A2) and when enabled, provide 8 mutually exclusive active HIGH outputs (Y0 to Y7).

The HC238 features three enable inputs: two active LOW ($\bar{E}1$ and $\bar{E}2$) and one active HIGH (E3). Every output will be LOW unless $\bar{E}1$ and $\bar{E}2$ are LOW and E3 is HIGH.

This multiple enable function allows easy parallel expansion of the HC238 to a 1-of-32 (5 lines to 32 lines) decoder with just four HC238 ICs and one inverter.

The HC238 can be used as an eight output demultiplexer by using one of the active LOW enable inputs as the data input and the remaining enable inputs as strobes. Unused enable inputs must be permanently tied to their appropriate active HIGH or LOW state.

The HC238 is identical to the HC138 but has non-inverting outputs.

PIN DESCRIPTION

PIN NO.	SYMBOL	NAME AND FUNCTION
1, 2, 3	A ₀ to A ₂	address inputs
4, 5	\bar{E}_1, \bar{E}_2	enable inputs (active LOW)
6	E ₃	enable input (active HIGH)
8	GND	ground (0 V)
15, 14, 13, 12, 11, 10, 9, 7	Y ₀ to Y ₇	outputs (active HIGH)
16	VCC	positive supply voltage

L	L	H	L	H	H	L	L	L	L	L	L	H	L
L	L	H	H	H	H	L	L	L	L	L	L	L	H

Note

1. H = HIGH voltage level
2. L = LOW voltage level
3. X = don't care

QUICK REFERENCE DATA

GND = 0 V; $T_{amb} = 25^{\circ}\text{C}$; $t_r = t_f = 6 \text{ ns}$

SYMBOL	PARAMETER	CONDITIONS	TYPICAL	UNIT
t_{PHL}/t_{PLH}	propagation delay A_n to Y_n E_3 to Y_n \bar{E}_n to Y_n	$C_L = 15 \text{ pF}$; $V_{CC} = 5 \text{ V}$	14 16 17	ns ns ns
C_i	input capacitance		3.5	pF
CPD	power dissipation capacitance per package	notes 1 and 2	72	pF

Notes

CPD is used to determine the dynamic power dissipation (PD in μW):

$PD = CPD \times V_{CC}^2 \times f_i + \sum (C_L \times V_{CC}^2 \times f_o)$ where:

f_i = input frequency in MHz

f_o = output frequency in MHz

$\sum (C_L \times V_{CC} \times f_o)$ = sum of outputs

C_L = output load capacitance in pF

V_{CC} = supply voltage in V

For HC238 the condition is $V_I = \text{GND to } V_{CC}$

AC CHARACTERISTICS FOR

GND = 0 V; $t_r = t_f = 6$ ns; CL = 50 pF

IMPORTANT STATEMENT:

Huaguan Semiconductor reserves the right to change its products and services without notice. Before ordering, the customer shall obtain the latest relevant information and verify whether the information is up to date and complete. Huaguan Semiconductor does not assume any responsibility or obligation for the altered documents.

Customers are responsible for complying with safety standards and taking safety measures when using Huaguan Semiconductor products for system design and machine manufacturing. You will bear all the following responsibilities: select the appropriate Huaguan Semiconductor products for your application; Design, validate and test your application; Ensure that your application meets the appropriate standards and any other safety, security or other requirements. To avoid the occurrence of potential risks that may lead to personal injury or property loss.

Huaguan Semiconductor products have not been approved for applications in life support, military, aerospace and other fields, and Huaguan Semiconductor will not bear the consequences caused by the application of products in these fields.

The technical and reliability data (including data sheets), design resources (including reference designs), application or other design suggestions, network tools, safety information and other resources provided for the performance of semiconductor products produced by Huaguan Semiconductor are not guaranteed to be free from defects and no warranty, express or implied, is made. The use of testing and other quality control technologies is limited to the quality assurance scope of Huaguan Semiconductor. Not all parameters of each device need to be tested.

The documentation of Huaguan Semiconductor authorizes you to use these resources only for developing the application of the product described in this document. You have no right to use any other Huaguan Semiconductor intellectual property rights or any third party intellectual property rights. It is strictly forbidden to make other copies or displays of these resources. You should fully compensate Huaguan Semiconductor and its agents for any claims, damages, costs, losses and debts caused by the use of these resources. Huaguan Semiconductor accepts no liability for any loss or damage caused by infringement.
