

Quadruple Operational Amplifiers

DESCRIPTION

The LM324 consists of four independent, high gain, internally frequency compensated operational amplifiers which were designed specifically to operate from a single power supply over a wide range of voltages. Operation from split power supplies is also possible and the low power supply current drain is independent of the magnitude of the power supply voltage.

Application areas include transducer amplifiers, DC gain blocks and all the conventional op amp circuits.

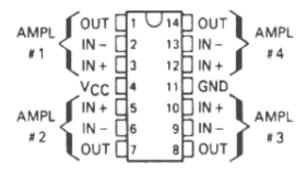

FEATURES

- Wide range of supply voltages
- Low supply current drain independent of supply voltage
- Low input biasing current
- Low input offset voltage and offset current
- Input common-mode voltage range includes ground
- Differential input voltage range equal to the power supply voltage
- DC voltage gain 100 V/ mV Typ
- Internally frequency compensation

ORDERING INFORMATION

DEVICE	Package Type	MARKING	Packing	Packing Qty	
LM324N	DIP14	LM324	TUBE	1000pcs/Box	
LM324M/TR	SOP14	LM324	REEL	2500pcs/Reel	
LM324MT/TR	TSSOP14	LM324	REEL	2500pcs/Reel	

PACKAGE INFORMATION

DIP14/SOP14/TSSOP14

ELECTRICAL CHARACTERISTICS

at specified free-air temperature, VCC = 5V (unless otherwise noted)
