

Disconnectable Crimp style connectors

The RF connector was developed as a highly reliable, low-cost, crimp style connector for connecting wires to printed circuit boards. Well suited for internal connections in office automation equipment, such as personal computers, office computers and their peripheral devices.

### Features ———

### • Highly reliable, yet low in cost

Our original double-leaf spring construction withstands the stresses caused by repeated insertions and withdrawals and ensures reliable contact performance. Depending on the application, the socket contacts and header posts can be selectively gold-plated or fully tin-plated to minimize costs.

### Space-saving, high-density design

The 2.54mm pitch contacts are arranged in two rows. The mated connectors can be placed side by side or end to end without a loss in pitch. This facilitates space-saving, high-density circuit designs.

### Easy connection

A slight force is all that is required for contact insertion because the housing has resilient lances. Furthermore, the positions of the contacts in the housing can be visually checked. This facilitates insertion of the contacts in the housing.

### It can be cut to any length to provide a header with any number of circuits

Notches are provided on the insulator that allow it to be cut to any length without using special tools.

## Specifications –

- Current rating: 2A AC, DC (AWG #24)
- Voltage rating: 250V AC, DC
- Temperature range: (including temperature rise in applying

electrical current)

-55°C to +105°C (gold-plated)

-55°C to +85°C (tin-plated)

• Contact resistance: Initial value/ $15m\Omega$  max.

After environmental testing/ $30m\Omega$  max.

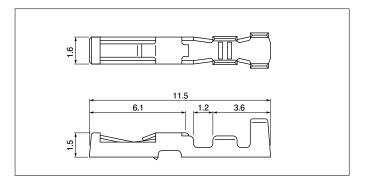

- Insulation resistance:  $1,000M\Omega$  min.
- Withstanding voltage: 1,500V AC/minute
- Applicable wire: AWG #30 to #24
- Applicable PC board thickness: 1.2 to 1.6mm
- \* Compliant with RoHS.
- \* Refer to "General Instruction and Notice when using Terminals and Connectors" at the end of this catalog.
- \* Contact JST for details.

### Standards ——

Recognized E60389

⊕ Certified LR20812

RoHS compliance

### Header -

#### Top entry type

Model No.	Mat	erial	Finish	
	Wafer	Post	Finish	
RF-H(*) 2TD-1130	PBT, UL94V-0.	Brass	Nickel-undercoated, gold-plated	
RF-H(*) 2TD-1190	black		Copper-undercoated, tin-plated (reflow treatment)	

### Side entry type

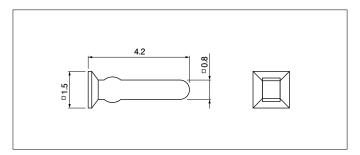

Model No.	Mat	erial	Finish	
	Wafer	Post		
RF-H (*) 2SD-1110	PBT, UL94V-0.	Brass	Nickel-undercoated, Mating part: gold-plated Solder tail: tin-plated (reflow treatment)	
RF-H(*) 2SD-1190	black		Copper-undercoated, tin-plated (reflow treatment)	

 $\mbox{RoHS compliance} \quad \mbox{Tin-plated product displays (LF)(SN) on a label.}$  Note:

- A two-digit number (02 to 60 even numbers only) representing the number of circuits should be inserted in ( \* ).

  Determine the number depending on the number of circuits of the housing
- 2. Contact JST for special products.

### Polarizing key-

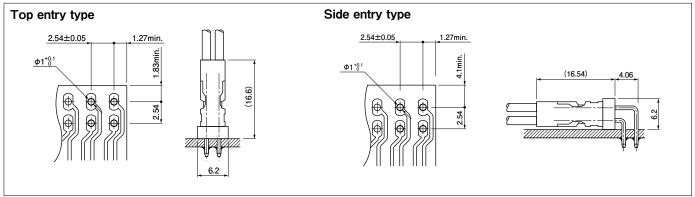

Model No.	Q'ty / bag			
PK-RF-1	10,000			
Material				
PBT, UL94V-0, natural (white)				

#### RoHS compliance

Polarizing key: The polarizing key in the housing prevents misinsertion of the connector to the header.

### PC board layout (viewed from soldering side) and Assembly layout-

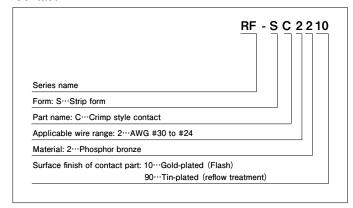

#### Note:

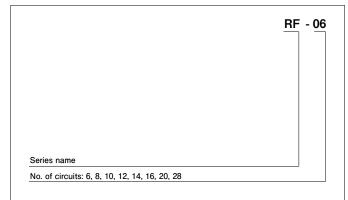

- 1. Tolerances are non-cumulative:  $\pm$  0.05mm for all centers.
- 2. Hole dimensions differ according to the type of PC board and piercing method. The dimensions above should serve as a guideline. Contact JST for details.
