## 1. Scope

This specification shall be defined of the Clock Oscillator for the integrated circuits (ICs).

## 2. Customer Part Number

## 3. KYOCERA Part Number

#### KC2016Z\*\*.\*\*\*C1KX00

# 4. Electrical Characteristics

#### 4-1. Absolute Maximum Rating

| Item                 | Symbol           | Rated Value                  | Units |
|----------------------|------------------|------------------------------|-------|
| Power Supply Voltage | V <sub>CC</sub>  | -0.3 to +4.5                 | V     |
| Input Voltage        | V <sub>IN</sub>  | -0.3 to V <sub>CC</sub> +0.3 | V     |
| Storage Temperature  | T <sub>STG</sub> | -55 to +150                  | °C    |

Note:

If the part is used beyond absolute maximum ratings, it may cause internal destruction. The part should be used under the recommended operating conditions the reliability of this part may be damaged if those conditions are exceeded.

#### 4-2. Recommended Operating Conditions

| Item                  | Symbol           | Min  | Тур | Max             | Units | Remarks |
|-----------------------|------------------|------|-----|-----------------|-------|---------|
| Power Supply Voltage  | V <sub>cc</sub>  | 1.71 | 3.3 | 3.63            | V     |         |
| Input Voltage         | V <sub>IN</sub>  | 0    |     | V <sub>CC</sub> | V     |         |
| Operating Temperature | T <sub>OPR</sub> | -40  | +25 | +85             | °C    |         |

#### 4-3. Electrical Characteristics

| Item                                   | Symbol          | Min | Тур     | Max  | Units | Remarks                     |
|--|-----------------|-----|---------|------|-------|-----------------------------|
| Output Frequency                       | Fo              | 0.5 | ** **** | 170  | MHz   |                             |

4-4. Measurement Condition

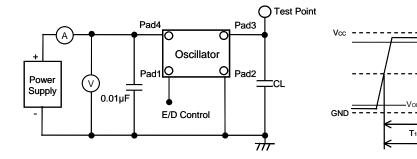

The reference temperature shall be  $+25\pm2^{\circ}$ C. The measurement shall be performed at the temperature range of +5 °C to +35 °C unless otherwise the result is doubtful.

4-5. Measurement Circuit

The electrical characteristics shall be measured by test circuit "Fig. 1". Also jitter shall be measured by test circuit "Fig. 3".

4-6. Clock Timing Chart

The clock timing chart is "Fig. 2".

Note: CL includes probe and test fixture capacitance

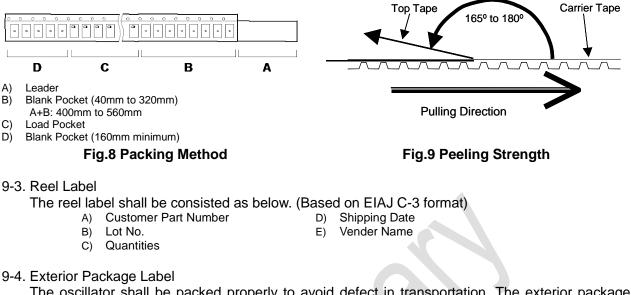

Fig.7 Reel

9-1. Taping Quantities

- The taping of per reel shall be packed 2,000 pcs.
- The parts shall be contained continuously in the pocket.

| Drawing No. TKY1D-H2-19556-00[45] [8/9] |
|---|
|---|

- 9-2. Leader and Blank Pockets
  - The package shall be consisted of leader, blank pockets and loaded pocket as follows "Fig. 8".
  - The power of peeling strength between top tape and carrier tape shall be 0.1N(10gf) to 0.7N(70gf) as follows "Fig. 9".

The oscillator shall be packed properly to avoid defect in transportation. The exterior package label shall be consisted as below.

- A) Name of Customer
- B) P/O No.
- C) **Customer Part Number**
- D) Lot No.

- Quantities E)
- Shipping Date F)
- G) Vender Name

## **10. Production**

 KYOCERA Corporation Yamagata Higashine Plant 5850 Higashine-koh ohaza Higashine-shi Yamagata 999-3701, Japan

# 11. The agreement of this specifications

In case there is any obscure point or doubt concerning the contents of the specification, it shall be settled through consultation of both parties.

## 12. Remarks on Usages

A) Storage Conditions

The parts shall be stored in temperature range of -5 to +40°C, humidity 40 to 60% RH, and avoid direct sunlight. Then the parts shall be used within 6 months.

B) Handling Conditions

Although the part has protection circuit against static electricity, when excess static electricity is applied, the inside IC may get damaged.

Before mounting on the PCB, please make sure the direction of the part is correct. Otherwise the part of temperature will increase. And also the part will have some damages.

Please do not use the parts under the unfavorable condition such as beyond specified range in this specification.

Please do not use the parts under the condition, in the water or in the salt water also environment of dew or harmful gas.

Frequency drift may occur as a result of application of light such as direct sunlight or LED light etc when operating this oscillator.

Please use in a design and environment that consider light shielding.

Note the frequency drift will not occur if used in a light-shielded environment.

Please make sure the condition of pick and place following pick up nozzle guideline.

Picking Method: Case of Head Unit 1.6 x 1.2mm (Inside Diameter)

The proper condition of pick and place will be different each equipment. Therefore, please check before testing.

- C) Rework Condition Please do not pick up Head Unit. We can't guaranty electrical performance and reliability.
- D) Soldering Conditions

This product can respond to the general Pb-free reflow profile. The wave soldering cannot be supported.

E) Soldering in Mounting

In case of Solder paste and conductive glue contact product lid or product side face exception for product terminal it's possible to influence product characteristics. Please be careful above contents.

F) Washing Conditions

Ultra sonic cleaning is available. However there is a possibility that Crystal in the part may cause damaged under certain condition. Therefore please test before using. After washing, please dry the parts completely. Otherwise water drops between the parts and PCB may cause migration.

In case of using this part without above precaution, Kyocera is unable to guarantee the specific characteristics.
