

MGV High Current Molded SMT Power Inductors MGV0402 Series

FEATURES AND APPLICATIONS

Laird MGV series high current power inductors improve performance, reliability and power efficiency. A lower profile benefits consumer electronics and telecom design. Products feature extremely low DCR with greater efficiency and enable a large current in a small size. Inductors are of magnetic shielding and molded construction and perform in operating temperatures ranging from -40 C to 125 C including self-heating rise in temperature.

FEATURES

- · Magnetic shielded structure
- Low DCR and high efficiency
- Low profile and miniaturization
- High reliability

APPLICATIONS

- DC-DC Converter and Power Suppliers
- LCD TV'S and Gaming Console
- Tablet, Notebooks, Servers and Printers
- Networking and Data storage
- GPS, Set-top-box and Base stations
- Smart meters and Medical instruments

PART NUMBER EXPLANATION

Note: Automotive grade parts are also available, a specific P.N will be assigned upon request. Please contact laird local sales for details.

ELECTRICAL SPECIFICATIONS

- Tolerance: M: ±20% or N: ±30%
- Inductance tested at 100KHz, 1.0V
- Heat Rated Current (Irms) is defined based on temperature rise approximate 40°C without core loss (ambient temperature 25±5°C)
- Saturation Current (Isat) is the DC current at which the inductance drops off approximately 30% from its value without current. (ambient temperature 25±5°C)
- Operating temperature range: -40°C~+125°C (including self-heating temperature rise)
- Storage temperature range (packaging conditions): -10°C~+40°C and RH 60%(MAX.)

Note: Heat Rated Current (Irms) is tested on a typical PCB and apply a constant current in still air.

The temperature rise is dependent on the application system condition including PCB PAD pattern, trace width and thickness and adjacent components etc. It's suggested to verify the temperature rise of the component under the real operation application conditions.

The force peeling off cove tape is 10 to 100 grams						
in the arrow direction under the following conditions						
Room Temp						
(℃) Humidity (hPa) Speed						
5~35	45~85	860~1060	300			

Storage Conditions

- 1. Temperature and humidity conditions: -10-+40°C and 60% RH.
- 2. Recommended products should be used within 12 month from the time of manufacturing.
- 3. The packaging material should be kept where no chloring or sulfur exists in the air.
- 4. Allowable stacking condition of Packaging box: max height 1.5m or 5 boxes stacking
