Description

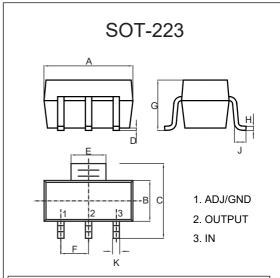

MCT1119C is a series of low dropout three-terminal regulators with a dropout of 1.3V at 1A load current. MCT1119C features a very low standby current 2mA compared to 5mA of competitor.

Other than a fixed version, Vout = 1.5V and adjustable version, which can provide an output voltage from 1.25 to 12V with only two external resistors. MCT1119C offers thermal shut down function, to assure the stability of chip and power system. And it uses trimming technique to guarantee output voltage accuracy within 2%. Other output voltage accuracy can be customized on demand, such as 1%.
