Product Description

The CT100 is a 1D linear sensor in full-bridge configuration from Crocus Technology developed on its patented MLU™ technology. The total magnetic field range for the CT100 is from -50 mT to +50 mT and it achieves a linearity error of $\pm 0.5\%$ for a range of -20 mT to +20 mT while providing XtremeSense™ performance to achieve unparalleled temperature stability. It supports a wide operating voltage range of 1.0 V to 5.5 V.

It is available in a 6-lead SOT23 package and for space critical applications, a low profile and small form factor 6-lead DFN package that is 1.50 × 1.50 × 0.45 mm in size.

Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the CT100 and may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.
