Chip Bead Cores

Type: EXCCL EXCML EXC3B

Discontinued

- Features
- Effective noise suppression for power lines and high speed signal lines
- Easy pattern layout on PC Board
- RoHS compliant

Type: EXCCL, EXCML

- Low DC Resistance 3 to 8 mΩ typical: Rated current (3 and 4 Amperes) (type: EXCML)
- Low impedance

Type: EXC3B

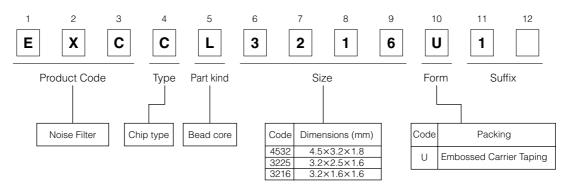

- High impedance for high speed signal line noise
- Increased attenuation
- 60 Ω -1 A, 120 Ω -0.5 A are achieved by using 1608 size (type: EXC3BP)

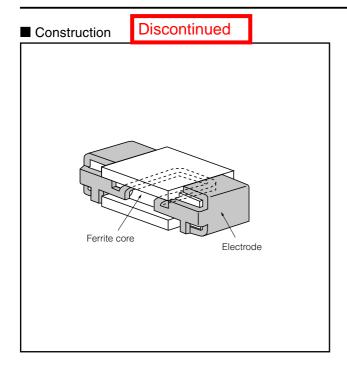

■ Recommended Applications

- Digital equipment such as PCs, word processors, printers, HDD, PCC, CD-ROMs, DVD-ROMs.
- Digital audio and video equipment such as VCRs, DVC, CD Players, DVD Players.
- AC adapters, and switching power supplies.
- Electronic musical instruments, and other digital equipment.

■ Recommended Soldering Conditions

Recommendations and precautions are described below.

- Recommended soldering conditions for reflow
- Reflow soldering shall be performed a maximum of two times
- · Please contact us for additional information when used in conditions other than those specified.
- Please measure the temperature of the terminals and study every kind of solder and printed circuit board for solderability before actual use.

For soldering (Example: Sn-37Pb)

	Temperature	Time	
Preheating	140 °C to 160 °C	60 s to 120 s	
Main heating	Above 200 °C	30 s to 40 s	
Peak	235 ± 10 °C	max. 10 s	

For lead-free soldering (Example : Sn/3Ag/0.5Cu)

	Temperature	Time	
Preheating	150 °C to 170 °C	60 s to 120 s	
Main heating	Above 230 °C	30 s to 40 s	
Peak	max. 260 °C	max. 10 s	

- Flow soldering
- · Flow soldering may cause this product to come off because the adhesiveness of the product element is low. Please consult our sales representative in advance about flow soldering.

<Repair with hand soldering>

- Preheat with a blast of hot air or similar method. Use a soldering iron with a tip temperature of 350 °C or less. Solder each electrode for 3 seconds or less.
- Never touch this product with the tip of a soldering iron.

The following are precautions for individual products. Please also refer to the common precautions for Noise Suppression Device shown on this catalog.

- 1. Use rosin-based flux or halogen-free flux.
- 2. For cleaning, use an alcohol-based cleaning agent. Before using any other type, consult with our sales person in advance.
- 3. Do not apply shock to Chip Bead Cores (hereafter called the bead cores) or pinch them with a hard tool (e.g. pliers and tweezers). Otherwise, their bodies may be chipped, affecting their performance. Excessive mechanical stress may damage the bead cores. Handle with care.
- 4. Store the bead cores in a location with a temperature ranging from -5 °C to +40 °C and a relative humidity of 40 % to 60 %, where there are no rapid changes in temperature or humidity.
- 5. Use the bead cores within a year (EXC3B Type: within half a year) after the date of the outgoing inspection indicated on the packages.
