

High Frequency Wire Wound Transformers

EP10+ Platforms - SMT - PA5130.XXXNL AND PA5131.XXXNL

- Ⓢ Industry standard footprint, 2X more power handling
- Ⓢ **Power Range:** PA5130.XXXNL up to 25W;
PA5131.XXXNL up to 35W
- Ⓢ **Height:** 15.5mm Max
- Ⓢ **Footprint:** 15.5mm x 13.0mm Max
- Ⓢ **Topology:** Forward and Flyback

Pulse PN	Electrical Specifications @25°C – Operating Temperature -40°C to 125°C ¹				Schematic

K1 Factor	104				

Notes:

- The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
- For flyback topology applications, it is necessary to ensure that the transformer will not saturate in the application. The peak flux density (Bpk) should remain below 2700Gauss. To calculate the peak flux density use the following formula:
 $B_{pk} \text{ (Gauss)} = K1_Factor * I_{pk} \text{ (A)}$
- In high volt-μsec applications, it is important to calculate the core loss of the transformer. Approximate transformer core loss can be calculated as:

$$\text{CoreLoss (W)} = 8.38E-14 * (\text{Freq_kHz})^{1.63} * (\Delta B_Gauss)^{2.63}$$

where ΔB can be calculated as:

For Flyback Topology: $\Delta B = K1_Factor * \Delta I \text{ (A)}$

For Forward Topology: $\Delta B = K1_Factor * \text{Volt-}\mu\text{sec}$

- Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. PA5130.001NL becomes PA5130.001NLT). Pulse complies with industry standard tape and reel specification EIA481. The tape and reel for this product has a width (W=32mm), pitch (Po=24mm) and depth (Ko=15.7mm).
