

RF360  
Europe GmbH

## Data sheet

### SAW RF downlink filter

Base stations  
TD-LTE band 40

Series/type: B5312  
Ordering code: B39232B5312U410

Date: June 13, 2019

Version: 2.1

RF360 products mentioned within this document are products of RF360 Europe GmbH and other subsidiaries of RF360 Holdings Singapore Pte. Ltd. (collectively, the "RF360 Subsidiaries").

RF360 Europe GmbH, Anzinger Str. 13, München, Germany

## 1 Application

- RF filter for band 40 downlink
- Unbalanced to unbalanced operation
- Low amplitude ripple
- Usable pass band 50 MHz
- No matching required for operation at 50  $\Omega$

## 2 Features

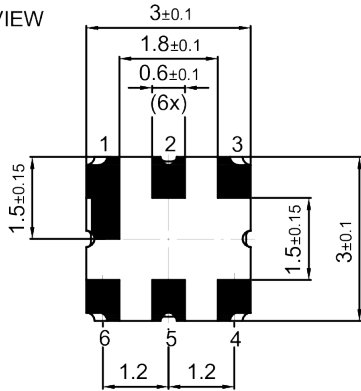

- Package code DCC6C
- Package size  $3.0_{\pm 0.1}$  mm  $\times$   $3.0_{\pm 0.1}$  mm
- Package height  $1.1_{\pm 0.125}$  mm
- Approximate weight 0.04 g
- RoHS compatible
- Package for Surface Mount Technology (SMT)
- Ni/Au-plated terminals
- Lead free soldering compatible with J-STD20C
- Electrostatic Sensitive Device (ESD)
- Moisture Sensitivity Level 1 (MSL1)

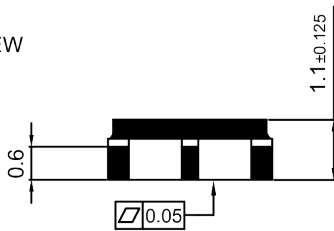

**Figure 1:** Picture of component with example of product marking.

## 6 Characteristics

Temperature range for specification	$T_{SPEC}$	= -40 °C ... +85 °C
Input terminating impedance	$Z_{IN}$	= 50 $\Omega$
Output terminating impedance	$Z_{OUT}$	= 50 $\Omega$

Characteristics			min. for $T_{SPEC}$	typ. @ +25 °C	max. for $T_{SPEC}$	
<b>Center frequency</b>			—	2345	—	MHz
<b>Maximum insertion attenuation</b>						
	2320... 2370	MHz	—	2.5	3.0	dB
<b>Amplitude ripple (p-p)</b>						
	2320... 2370	MHz	—	0.7	1.2	dB
<b>Group delay ripple</b>						
	2320... 2370	MHz	—	10	30	ns
<b>Maximum VSWR</b>						
@ input port	2320... 2370	MHz	—	1.5	1.8	
@ output port	2320... 2370	MHz	—	1.5	1.9	
<b>Minimum attenuation</b>						
	10... 2190	MHz	30	38	—	dB
	2190... 2250	MHz	25	32	—	dB
	2250... 2300	MHz	6	20	—	dB
	2390... 2400	MHz	6	19	—	dB
	2400... 2460	MHz	15	31	—	dB
	2460... 2550	MHz	30	43	—	dB
	2550... 4000	MHz	25	30	—	dB
	5000... 5700	MHz	15	28	—	dB
	5700... 6000	MHz	15	32	—	dB

## 7 Maximum ratings

Operable temperature	$T_{OP} = -40\text{ °C} \dots +125\text{ °C}$	
Storage temperature	$T_{STG}^{1)} = -40\text{ °C} \dots +125\text{ °C}$	
DC voltage	$ V_{DC}  = 5.0\text{ V}$	
ESD voltage		
	$V_{ESD}^{2)} = 100\text{ V}$	Machine model.
	$V_{ESD}^{3)} = 150\text{ V}$	Human body model.
Input power	$P_{IN}$	
@ input port: 2320 ... 2370 MHz	20 dBm	Continuous wave for 2 h @ 85 °C.
@ input port: 2320 ... 2370 MHz	15 dBm	Continuous wave for 1000 h @ 85 °C.
@ input port: 2320 ... 2370 MHz	10 dBm	Continuous wave for 100000 h @ 85 °C.

<sup>1)</sup> Not valid for packaging material. Please refer to definition of Shelf life (p. 17).

<sup>2)</sup> According to JESD22-A115B (MM – Machine Model), 10 negative & 10 positive pulses.

<sup>3)</sup> According to JESD22-A114F (HBM – Human Body Model), 1 negative & 1 positive pulse.

8 Transmission coefficient

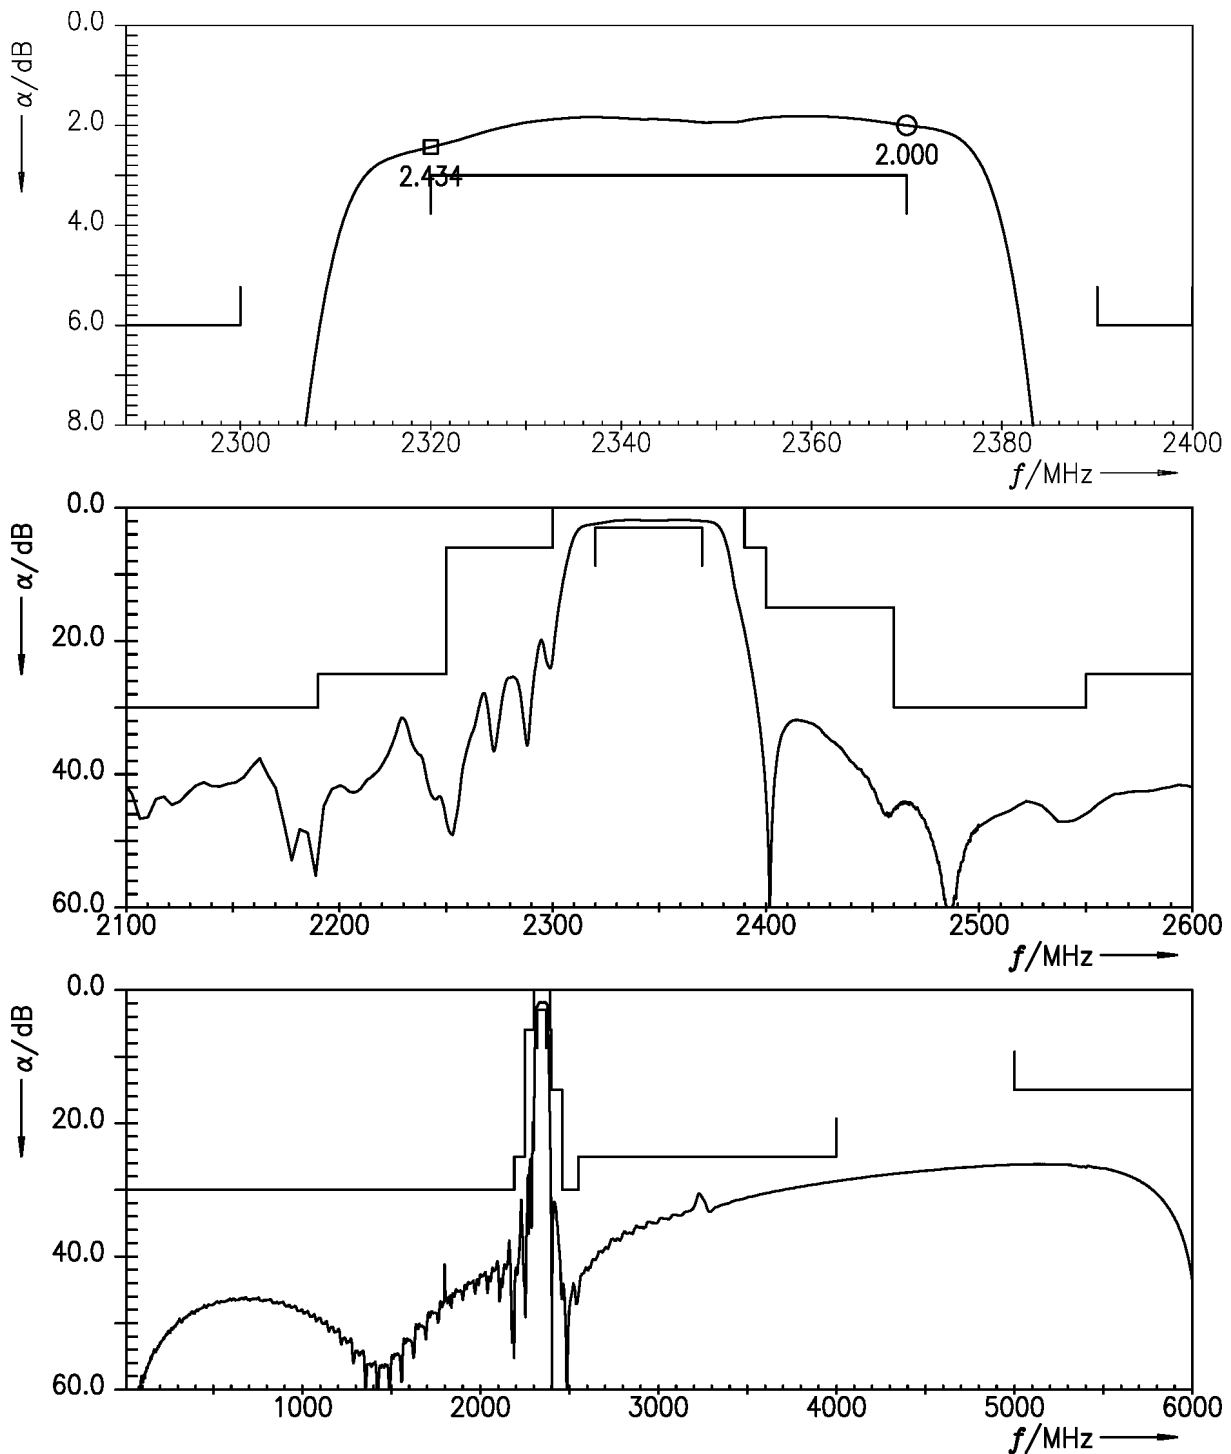

Figure 4: Attenuation.

9 Reflection coefficients

Figure 5: Reflection coefficient at input port.

Figure 6: Reflection coefficient at output port.

## 10 Group delay

Figure 7: Group delay ripple.

11 Packing material

11.1 Tape

Figure 8: Drawing of tape (first-angle projection) for illustration only and not to scale. The valid tape dimensions are listed in Table 1.

A <sub>0</sub>	3.25±0.1 mm	E <sub>2</sub>	10.25 mm (min.)	P <sub>1</sub>	4.0±0.1 mm
B <sub>0</sub>	3.3±0.1 mm	F	5.5±0.05 mm	P <sub>2</sub>	2.0±0.1 mm
D <sub>0</sub>	1.5+0.1/-0 mm	G	0.75 mm (min.)	T	0.3±0.05 mm
D <sub>1</sub>	1.5 mm (min.)	K <sub>0</sub>	1.5±0.1 mm	W	12.0+0.3/-0.1 mm
E <sub>1</sub>	1.75±0.1 mm	P <sub>0</sub>	4.0±0.1 mm		

Table 1: Tape dimensions.

11.2 Reel with diameter of 180 mm

Figure 9: Drawing of reel (first-angle projection) with diameter of 180 mm.

Dimensions

- L = 182
- B = 185
- H = 26

Figure 10: Drawing of folding box for reel with diameter of 180 mm.

11.3 Reel with diameter of 330 mm

Figure 11: Drawing of reel (first-angle projection) with diameter of 330 mm.

Dimensions

- L = 340
- B = 340
- H = 25

for 330 mm Reel for 12 mm / 16mm tape width  
SMD packages

Figure 12: Drawing of folding box for reel with diameter of 330 mm.

## 12 Marking

Products are marked with device designation, lot number, as well as production location and date code.

- Device designation: The 4-character device designation of the ordering code is used for the marking.

Example for 4-character device designation: B3xxxxB1234xxxx

- Lot number: The last 5 digits of the lot number are used for the marking.

Example: 12345

- Production location and date code: The production location is Wuxi (encoded in the first character 'C'). The production date code is encoded in the last three characters according to Table 2.

1 <sup>st</sup> digit (day)						2 <sup>nd</sup> digit (year)				3 <sup>rd</sup> digit (month)			
Day	Code	Day	Code	Day	Code	Year	Code	Year	Code	Month	Code	Month	Code
1	1	11	A	21	M	2010	A	2022	P	Jan	1	Jul	7
2	2	12	B	22	N	2011	B	2023	R	Feb	2	Aug	8
3	3	13	C	23	P	2012	C	2024	S	Mar	3	Sep	9
4	4	14	D	24	R	2013	D	2025	T	Apr	4	Oct	0
5	5	15	E	25	S	2014	E	2026	U	May	5	Nov	N
6	6	16	F	26	T	2015	F	2027	V	Jun	6	Dec	D
7	7	17	H	27	U	2016	H	2028	W				
8	8	18	J	28	V	2017	J	2029	X				
9	9	19	K	29	W	2018	K	2030	Z				
10	0	20	L	30	X	2019	L	2031	A				
				31	Z	2020	M	2032	B				
						2021	N	and so on					

**Table 2:** Production date code.

Example of how to decode production location and date code:

Code:           **C T F 6**

Location:       **C**       → Wuxi

Day:             **T**       → 26<sup>th</sup>

Year:            **F**       → 2015

Month:           **6**       → June

### 13 Soldering profile

The recommended soldering process is in accordance with IEC 60068-2-58 – 3<sup>rd</sup> edit and IPC/JEDEC J-STD-020B.

ramp rate	≤ 3 K/s
preheat	125 °C to 220 °C, 150 s to 210 s, 0.4 K/s to 1.0 K/s
T > 220 °C	30 s to 70 s
T > 230 °C	min. 10 s
T > 245 °C	max. 20 s
T ≥ 255 °C	–
peak temperature $T_{peak}$	250 °C +0/-5 °C
wetting temperature $T_{min}$	230 °C +5/-0 °C for 10 s ± 1 s
cooling rate	≤ 3 K/s
soldering temperature T	measured at solder pads

**Table 3:** Characteristics of recommended soldering profile for lead-free solder (Sn95.5Ag3.8Cu0.7).

**Figure 13:** Recommended reflow profile for convection and infrared soldering – lead-free solder.

## 14 Annotations

### 14.1 RoHS compatibility

ROHS-compatible means that products are compatible with the requirements according to Art. 4 (substance restrictions) of Directive 2011/65/EU of the European Parliament and of the Council of June 8th, 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment ("Directive") with due regard to the application of exemptions as per Annex III of the Directive in certain cases.

### 14.2 Scattering parameters (S-parameters)

The pin/port assignment is available in the headers of the S-parameter files. Please contact your local RF360 sales office.

### 14.3 Shelf life

The shelf life of components is determined by solderability of the package terminals. It is specified as 2 years from manufacturing date assuming the following conditions:

- storage in original packaging and non-aggressive atmosphere,
- storage temperature ranging from  $-25\text{ }^{\circ}\text{C}$  to  $+40\text{ }^{\circ}\text{C}$ , and
- storage humidity with  $\leq 75\%$  r.h. mean annual humidity,  $\leq 95\%$  r.h. for max. 30 days / year, and no dew condensation.

## 15 Cautions and warnings

### 15.1 Display of ordering codes for RF360 products

The ordering code for one and the same product can be represented differently in data sheets, data books, other publications and the website of RF360, or in order-related documents such as shipping notes, order confirmations and product labels. The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products. Detailed information can be found on the Internet under [www.rf360jv.com/orderingcodes](http://www.rf360jv.com/orderingcodes).

### 15.2 Material information

Due to technical requirements components may contain dangerous substances. For information on the type in question please also contact one of our sales offices.

For information on recycling of tapes and reels please contact one of our sales offices.

### 15.3 Moldability

Before using in overmolding environment, please contact your local RF360 sales office.

### 15.4 Package information

#### Landing area

The printed circuit board (PCB) land pattern (landing area) shown is based on RF360 internal development and empirical data and illustrated for example purposes, only. As customers' SMD assembly processes may have a plenty of variants and influence factors which are not under control or knowledge of RF360, additional careful process development on customer side is necessary and strongly recommended in order to achieve best soldering results tailored to the particular customer needs.

#### Dimensions

Unless otherwise specified all dimensions are understood using unit millimeter (mm).

#### Projection method

Unless otherwise specified first-angle projection is applied.

## 16 Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain **statements about the suitability of our products for certain areas of application**. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out **that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application**. As a rule, RF360 Europe GmbH and its affiliates are either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an RF360 product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that **in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified**. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. **The warnings, cautions and product-specific notes must be observed.**
4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet ([www.rf360jv.com/material](http://www.rf360jv.com/material)). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available.  
The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
