

Isolated Flyback Type PWM Mode BM1P10CFJ Evaluation Board

<High Voltage Safety Precautions>

◇ Read all safety precautions before use

Please note that this document covers only the BM1P10CFJ evaluation board (BM1P10CFJ-EVK-001) and its functions. For additional information, please refer to the datasheet.

To ensure safe operation, please carefully read all precautions before handling the evaluation board

Depending on the configuration of the board and voltages used,

Potentially lethal voltages may be generated.

Therefore, please make sure to read and observe all safety precautions described in the red box below.

Before Use

- [1] Verify that the parts/components are not damaged or missing (i.e. due to the drops).
- [2] Check that there are no conductive foreign objects on the board.
- [3] Be careful when performing soldering on the module and/or evaluation board to ensure that solder splash does not occur.
- [4] Check that there is no condensation or water droplets on the circuit board.

During Use

- [5] Be careful to not allow conductive objects to come into contact with the board.
- [6] **Brief accidental contact or even bringing your hand close to the board may result in discharge and lead to severe injury or death.**

Therefore, DO NOT touch the board with your bare hands or bring them too close to the board.

In addition, as mentioned above please exercise extreme caution when using conductive tools such as tweezers and screwdrivers.

- [7] If used under conditions beyond its rated voltage, it may cause defects such as short-circuit or, depending on the circumstances, explosion or other permanent damages.
- [8] Be sure to wear insulated gloves when handling is required during operation.

After Use

- [9] The ROHM Evaluation Board contains the circuits which store the high voltage. Since it stores the charges even after the connected power circuits are cut, please discharge the electricity after using it, and please deal with it after confirming such electric discharge.
- [10] Protect against electric shocks by wearing insulated gloves when handling.

This evaluation board is intended for use only in research and development facilities and should be handled **only by qualified personnel familiar with all safety and operating procedures.**

We recommend carrying out operation in a safe environment that includes the use of high voltage signage at all entrances, safety interlocks, and protective glasses.

AC/DC Converter

Isolated Flyback Type PWM Mode 48W 24V Output BM1P10CFJ Evaluation Board

BM1P10CFJ-EVK-001

General Description

- (1) Standby mode significantly reduces standby power consumption.
- (2) Spacing-saving is realized by MOSFET, start circuit incorporation.
- (3) It realizes the high flexibility because current sense resistance adjustment is possible.
- (4) Voltage = 45V or less one second after the cutting are realized by X condenser electric discharge function incorporation.
- (5) Electricity is reduced at no load time by power save function incorporation.
- (6) Efficiency in the light load is improved largely by burst movement, a frequency reduction mode.

Figure 1. BM1P10CFJ-EVK-001

Performance Specification

Operating Range

Parameter	Symbol	Min	Typ	Max	Units	Conditions
Input Voltage Range	V_{IN}	90	230	264	V	
Input Frequency	f_{LINE}	47	-	63	Hz	
Operating Temperature Range	T_{op}	-10	+25	+65	°C	

Performance Specification – Continued

Electrical characteristic

Not guarantee the characteristics is representative value.

Unless otherwise specified $V_{IN} = 230 \text{ Vac}$, $I_{OUT} = 2 \text{ A}$, $V_{STBY} = 5\text{V}$, $T_a = 25 \text{ }^\circ\text{C}$

Parameter	Symbol	Min	Typ	Max	Units	Conditions
Operating Start Input Voltage	V_{INST}	-	70	-	V	
Output Voltage	V_{OUT}	22.8	24	25.2	V	
Maximum Output Power	P_{OUT}	-	-	48	W	$I_{OUT} = 2 \text{ A}$
Output Current Range ^(Note 1)	I_O	0	-	2	A	
Output Voltage at Standby	$V_{OUTSTBY}$	7.1	7.5	7.9	V	$V_{STBY} = 0 \text{ V}$
Output Current at Standby	I_{OSTBY}	0		2	A	$V_{STBY} = 0 \text{ V}$
Wait electricity	P_{INSTBY}	-	40	-	mW	$I_{OUT} = 0 \text{ A}$ $V_{STBY} = 0 \text{ V}$
Power supply efficiency	η	86	89.6	-	%	
Output Ripple Voltage ^(Note 2)	V_{PP}	-	60	240	mVpp	

(Note 1) Please adjust operating time , within any parts surface temperature under 105 °C.

(Note 2) Not include spikes noise

Derating

Figure 2. Derating

Operation Procedure

1 Necessary Equipment

- (1) AC power supply (90 Vac to 264 Vac, 100 W or more)
- (2) Load equipment (5 A at maximum value)
- (3) DC voltmeter
- (4) Wattmeter
- (5) 5V power supply (10 mA)

2 Connect to Each Equipment

- (1) Connect a measuring instrument to Figure 3 reference as each power supply OFF.
- (2) Set the AC power supply to 90 Vac to 264 Vac, and power supply ON.
- (3) In the case of electronic load, load sets it between 0 A to 2A, and power supply ON.
- (4) The DC voltmeter of the output connects with directly outputting it, and confirm the voltage.
- (5) Connect STBY pin and GND pin to DC power supply. and apply +5V. The output voltage is 24V.

The output voltage becomes 7.5V when it is 0V. Set the input voltage of the STBY pin on less than +-8V.

BM1P10CFJ · General Description

Features

- AC Low Voltage Protection Function (AC UVLO)
- X Capacitor Discharge Function
- VCC Pin Low Voltage Protection (VCC UVLO)
- PWM Type Current Mode Control
- Frequency Reduction Function
- Burst Operation at Light Load
- Switching Function of Operation Modes
- Power Save Function
(Low Consumption Current at no load)
- Soft Start Function
- FB Pin Overload Protection Function (FB OLP)
- CS Pin Overload Protection Function (CS OLP)
- Switching Function of CS OLP Detection Voltage
- CS Pin Over Current Protection Function (CS OCP)
- CS Pin Leading Edge Blanking Function
- LA/ZT Pin Over Voltage Protection Function (ZT OVP)
- OUT Pin Gate Clamp Circuit

Key Specifications

- Operation Power Supply Voltage Range
 - VCC Pin Voltage: 9.3 V to 55.0 V
 - VH Pin Voltage: 650 V (Max)
- Current at Switching Operation: 0.70 mA (Typ)
- Current at Burst Operation: 0.35 mA (Typ)
- Current at Power Save Operation: 0.11 mA (Typ)
- Switching Frequency: 100 kHz (Typ)
- Operation Temperature Range: -40 °C ~ +105 °C

Package

SOP-J7S

W (Typ) x D (Typ) x H (Max)

4.9 mm x 6.0 mm x 1.65 mm

Pitch: 1.27 mm (Typ)

Applications

OA Equipment, AC Adapters, Each Household Applications and Power Supplies for Motor

Pin Configuration

Pin Descriptions

No.	Pin Name	I/O	Function
1	LA/ZT	I	Monitor auxiliary winding / Latch stop pin
2	FB	I	Feedback signal input pin
3	CS	I	Primary current detection pin
4	GND	-	GND pin
5	OUT	O	External MOSFET drive pin
6	VCC	I	Power supply input pin
7	VH	I	Startup power supply input / AC input voltage monitor pin

Specification of the Transformer

Manufacture Alphatrans Co., Ltd. (1-7-2, Bakurou-cho, Chuo-ku, Osaka City, 541-0059, Japan)
<http://www.alphatrans.jp/>

Product Name: XE2395Y
 Bobbin: 12PIN
 Core: PQQ2620

- Primary Inductance: 0.50mH± 10 %
(100 kHz, 1 V)
- Voltage Endurance
 - Between Primary and Secondary : AC1500 V
 - Between Primary and Core: AC1500 V
 - Between Secondary and Core: AC500 V
- Isolated Resistor 100 MΩ or more (DC500 V)

Revision History

Date	Rev.	Changes
24.August.2020	001	New Release

Notes

- 1) The information contained herein is subject to change without notice.
- 2) Before you use our Products, please contact our sales representative and verify the latest specifications :
- 3) Although ROHM is continuously working to improve product reliability and quality, semiconductors can break down and malfunction due to various factors.
Therefore, in order to prevent personal injury or fire arising from failure, please take safety measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures. ROHM shall have no responsibility for any damages arising out of the use of our Products beyond the rating specified by ROHM.
- 4) Examples of application circuits, circuit constants and any other information contained herein are provided only to illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.
- 5) The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM or any other parties. ROHM shall have no responsibility whatsoever for any dispute arising out of the use of such technical information.
- 6) The Products specified in this document are not designed to be radiation tolerant.
- 7) For use of our Products in applications requiring a high degree of reliability (as exemplified below), please contact and consult with a ROHM representative : transportation equipment (i.e. cars, ships, trains), primary communication equipment, traffic lights, fire/crime prevention, safety equipment, medical systems, servers, solar cells, and power transmission systems.
- 8) Do not use our Products in applications requiring extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters.
- 9) ROHM shall have no responsibility for any damages or injury arising from non-compliance with the recommended usage conditions and specifications contained herein.
- 10) ROHM has used reasonable care to ensure the accuracy of the information contained in this document. However, ROHM does not warrants that such information is error-free, and ROHM shall have no responsibility for any damages arising from any inaccuracy or misprint of such information.
- 11) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. For more details, including RoHS compatibility, please contact a ROHM sales office. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 12) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- 13) This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.

Thank you for your accessing to ROHM product informations.
More detail product informations and catalogs are available, please contact us.
