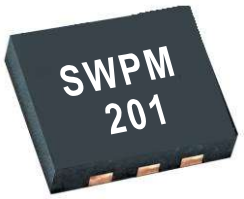
SWPM201 Arcadium™ Low Jitter Fixed Frequency Oscillator, 10 kHz to 350 MHz

The SWPM201 Arcadium™ all-silicon oscillator utilizes proprietary frequency synthesis and sensor technologies to provide a quartz-free, MEMS-free, low jitter clock at any output frequency. The device is factory-programmed to output frequencies ranging from 10 kHz to 350 MHz with <0.026 ppb resolution and maintains low jitter across its operating range. The SWPM201 uses on-chip temperature and strain sensors, and an advanced LC tank architecture to achieve excellent reliabilities even in high impact shock scenarios.

SWPM201's on-chip power supply filtering provides industry-leading power supply noise rejection, simplifying the task of generating low jitter clocks in noisy systems that use switched- mode power supplies. Offered in a variety of industry-standard packages, the SWPM201 has a dramatically simplified supply chain that enables Starwave to ship samples shortly after receipt of order. The SWPM201 is factory-configurable for a wide variety of user specifications, including frequency, output format, and OE pin assignment. Specific configurations are factory programmed at time of shipment, eliminating the long lead times associated with custom oscillators. This process also guarantees 100% electrical testing of every device before shipment.



KEY FEATURES

- Quartz-free and MEMS-free without mechanical moving parts
- Flexible output frequency and format; user selectable
- Differential: 10 kHz to 350 MHz
- CMOS: 10 kHz to 212.5 MHz
- LVPECL, LVDS, CML, HCSL, CMOS, or Dual CMOS output options
- Low jitter: 350 fs Typ RMS (12 kHz – 20 MHz)
- Compliant to PCIe Gen 1/2/3/4/5/6 jitter requirements
- Temperature stability:
  - ±12 ppm (0 to 70 °C)
  - ±20 ppm (-20 to 85 °C)
  - ±35 ppm (-40 to 85 °C)
  - ±35 ppm (-40 to 105 °C)
- Integrated LDO for on-chip power supply noise filtering
- Support 1.8V, 2.5V, 3.3V V_{DD} power supply operation
- Industrial standard 3225 and 5032 package footprints

APPLICATIONS

- 1G/10G/40G/100G/200G Ethernet
- Servers, switches, storage, NICs, search acceleration
- Test and measurement
- Clock and data recovery
- FPGA/ASIC clocking

Notes:

1. Stresses beyond those listed in this table may cause permanent damage to the device. Functional operation specification compliance is not implied at these conditions. Exposure to maximum rating conditions for extended periods may affect device reliability.

2. The device is compliant with JEDEC J-STD-020.

3. CMOS Buffer and Output Terminations

Dual CMOS output format ordering options support either complementary or in-phase signals for two identical frequency outputs. This feature enables replacement of multiple XOs with a single SWPM201 device.

Notes:

The following notes and stencil design are shared as recommendations only. A customer or user may find it necessary to use different parameters and fine-tune their SMT process as required for their application and tooling.

General

1. All dimensions shown are in millimeters (mm) unless otherwise noted.
2. Dimensioning and Tolerancing is per the ANSI Y14.5M-1994 specification.
3. This Land Pattern Design is based on the IPC-7351 guidelines.
4. All dimensions shown are at Maximum Material Condition (MMC). Least Material Condition (LMC) is calculated based on a Fabrication Allowance of 0.05 mm.

Solder Mask Design

1. All metal pads are to be non-solder mask defined (NSMD). Clearance between the solder mask and the metal pad is to be 60 µm minimum, all the way around the pad.

Stencil Design

1. A stainless steel, laser-cut and electro-polished stencil with trapezoidal walls should be used to assure good solder paste release.
2. The stencil thickness should be 0.125 mm (5 mils).
3. The ratio of stencil aperture to land pad size should be 0.8:1 for the pads.

Card Assembly

1. A No-Clean, Type-3 solder paste is recommended.
2. The recommended card reflow profile is per the JEDEC/IPC J-STD-020 specification for Small Body Components.

7. Top Marking (5032 and 3225 Package)

The figure below illustrates the mark specification for the SWPM201 The table below lists the line information.
