Description

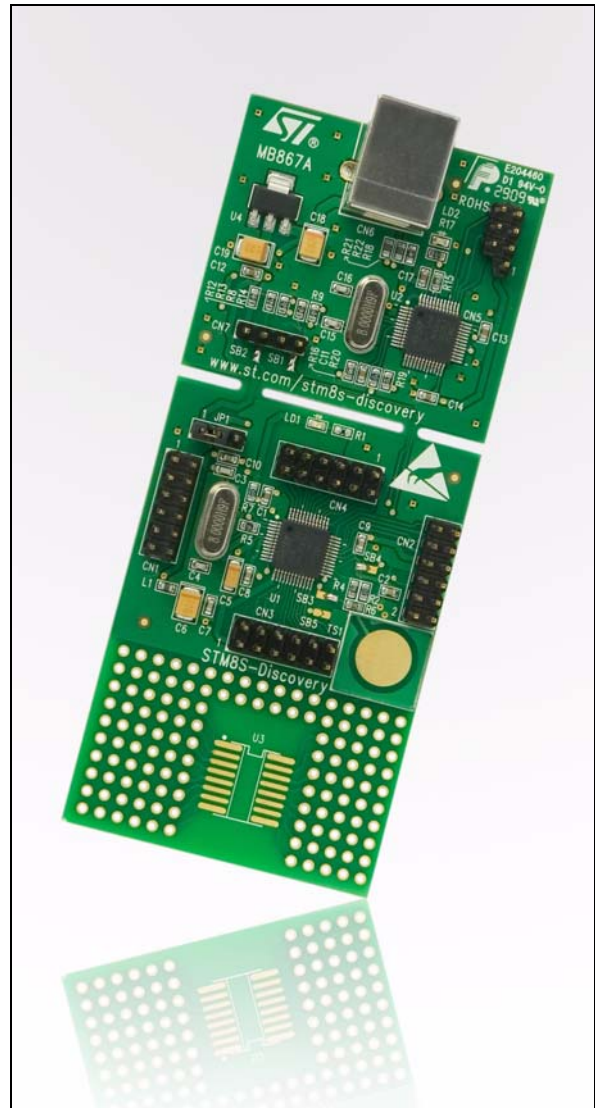

The STM8S-DISCOVERY helps you to discover the STM8S features and to develop and share your own application.

Even though the STM8S-DISCOVERY is built around an STM8S105C6T6, it allows evaluation of the main features of all the STM8S Access line MCUs. It includes an embedded debugger ST-Link, and a touch sensing button.

The STM8S-DISCOVERY simply plugs into a PC through a standard USB cable. Numerous applications are available from the STM8S-DISCOVERY web page.

Table 1. Device summary
