

T1635H, T1650H

High temperature 16 A Snubberless™ Triacs

Datasheet - production data

Features

- · Medium current Triac
- 150 °C max. T_i turn-off commutation
- · Low thermal resistance with clip bonding
- · Very high 3 quadrants commutation capability
- Packages are RoHS (2002/95/EC) compliant
- UL certified (ref. file E81734)

Applications

Especially designed to operate in high power density or universal motor applications such as vacuum cleaner and washing machine drum motor, these 16 A Triacs provide a very high switching capability up to junction temperatures of 150 °C.

The heatsink can be reduced, compared to traditional Triacs, according to the high performance at given junction temperatures.

Description

Available in through-hole or surface mount packages, the T1635H and T1650H Triac series are suitable for general purpose mains power ac switching.

By using an internal ceramic pad, the T16xxH-6l provides voltage insulation (rated at 2500 V rms).
