

Disc type capacitors with leads High voltage ceramic capacitors, commercial grade, safety standard approved

CS45 series

FEATURES

- O Compliant with IEC and the safety standards of various countries.
- Withstand voltage is 2,600V AC.
- O Flame-resistant reinforced outer insulation prevents fires, electrical shock, and other potential hazards.
- Oconform to RoHS directive due to lead(Pb) free of lead-wire and internal solder material.
- Ocompatible with halogen-free external resin coating.

APPLICATION

Y capacitor for AC adapter, charger, power supplies

□OPERATING TEMPERATURE RANGE

Temperature characteristics	Operating temperature (°C)	Storage temperature (°C)*		
SL	-40 to 125	-40 to 125		
В	-40 to 125	-40 to 125		
E	-40 to 125	-40 to 125		
F	_40 to 125	_40 to 125		

The maximum operating temperature of +125°C includes capacitor self-generated heat of up to 20°C.

☐STANDARD LEAD-WIRE SHAPES

Dimemsions in mm

TDK's standard product is vertical kink. TDK recommends short leads for bulk products.

*1 Body diameter (D) is reference value if D is smaller than maximum dimension of lead to lead distance (F).

*2 Coating on leads shall not extend beyond the bottom of vertical kink.

RoHS Directive Compliant Product: See the following for more details. http://product.tdk.com/en/environment/rohs/

O Halogen-free: Indicate that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.

^{*} After capacitor is mounted on board, the storage temperature range is applied.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

⚠ REMINDERS

- On ont use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- OBefore soldering, be sure to preheat components.

The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.

- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
 If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- On not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.

The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.

If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

- (1) Aerospace/aviation equipment
- (2) Transportation equipment (cars, electric trains, ships, etc.)
- (3) Medical equipment
- (4) Power-generation control equipment
- (5) Atomic energy-related equipment
- (6) Seabed equipment
- (7) Transportation control equipment

- (8) Public information-processing equipment
- (9) Military equipment
- (10) Electric heating apparatus, burning equipment
- (11) Disaster prevention/crime prevention equipment
- (12) Safety equipment
- (13) Other applications that are not considered general-purpose applications
- Please refer to the guideline of notabilia for fixed ceramic capacitors issued by JEITA(Japan Electronics and Information Technology Association, EIAJ RCR-2335).

This guideline describes general precautions* for using fixed ceramic capacitors. Please carefully confirm it and use capacitors safely.

* Items for check, explanation/reason/concrete example and failure examples, etc.

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.
