

THIN FILM PRECISION RESISTORS

TYPE CPF SERIES

INTRODUCTION

TE Connectivity (TE)'s CPF series is a high stability precision chip resistor range offering various power dissipations relating to a wide range of chip sizes. The CPF series offers TCR's down to 15 ppm/°C and resistance tolerances to 0.05 %. Standard values are within the IEC 63 E96 and E24 value grids. The CPF has accurate and uniform physical dimensions to facilitate placement.

FEATURES

- Thin film precision resistors with TC's to 15ppm and tolerances to 0.05 %.
- Wide range of case sizes from 0201 to 2512
- Suitable for all applications where close accuracy and stability are essential
- Terminal finish – electroplated 100 % matte Sn
- AEC-Q200 Compliance
- Moisture Sensitivity Level – MSL1

Note: SMD (Surface mount devices) resistors and inductors should be kept in their original packaging to protect them from ESD (Electrostatic Discharge). The full reels can be broken into smaller quantities, without exposing them to ESD, as long as the components are still in the plastic or paper tape. These resistors and inductors should not be removed from the plastic or paper tape unless they are in an ESD protected environment.

APPLICATIONS

- Communications
- Industrial Controls
- Instrumentation
- Medical

ELECTRICAL CHARACTERISTICS

Chip Size		0201					
Rated Power @ 70 °C		0.03125 W					
Resistance Range Ω	Min.	22R	22R	22R	22R	22R	22R
	Max	75K	75K	75K	75K	75K	75K
Tolerance		0.1		0.5		1
