Specification	**RT-1171**
This Issue:	Issue 7
Date:	December 5, 2001
Replaces:	Issue 6

Thermofit® MIL-LT Tubing
Low Shrink-Temperature
Polyolefin, Flexible, Heat-Shrinkable

1. SCOPE

This specification covers requirements for flexible electrical insulating, extruded tubing whose diameter will reduce to a predetermined size upon the application of heat in excess of 90°C *(194°F)*.

2. APPLICABLE DOCUMENTS

This specification takes precedence over documents referenced herein. Unless otherwise specified, the latest issue of referenced documents applies. The following documents form a part of this specifications to the extent specified herein.

2.1 GOVERNMENT-FURNISHED DOCUMENTS

Military

MIL-H-5606	Hydraulic Fluid, Petroleum Base, Aircraft, Missile and Ordnance
Mil-DTL-83133	Turbine Fuels, Aviation, Kerosene Types, NATO F-34 (JP-8), NATO F-35 and JP-8+100
MIL-L-7808	Lubricating Oil, Aircraft Turbine Engine, Synthetic Base
MIL-STD-104	Limits for Electrical Insulation Color
MIL-A-8243	Anti-icing and deicing-Defrosting Fluids
MIL-L-23699	Lubricating Oil, Aircraft Turbine Engines, Synthetic Base

2.2 OTHER PUBLICATIONS

ISO 846	Plastics-Evaluation of the action of microorganisms

American Society for Testing and Materials (ASTM)

D 2240	Standard Test Method for Rubber Property - Durometer Hardness
D 2671	Standard Methods of Testing Heat-Shrinkable Tubing for Electrical Use

(Copies of ASTM publications may be obtained from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103.)

3. REQUIREMENTS

3.1 MATERIALS

The tubing shall be fabricated form thermally stabilized, modified polyolefin and shall be crosslinked by irradiation. It shall be homogeneous and essentially free from flaws, defects, pinholes, bubbles, seams, cracks, and inclusions.

3.2 PROPERTIES

The tubing shall meet the requirements of Table 3.

3.3 COLOR

The tubing shall be available in black, white, red, yellow or blue, unless otherwise specified.

4. QUALITY ASSURANCE PROVISIONS

4.1 CLASSIFICATION OF TESTS

4.1.1 Qualification Tests

Qualification tests are those performed on tubing submitted for qualification as a satisfactory product and shall consist of all tests listed in this specification.

4.1.2 Acceptance Tests

Acceptance tests are those performed on tubing submitted for acceptance under contract. Acceptance tests shall consist of the following:

Dimensions
Longitudinal Change
Tensile Strength
Ultimate Elongation
Flammability
Heat Shock
Low Temperature Flexibility

4.2 SAMPLING INSTRUCTIONS

4.2.1 Qualification Test Samples

Qualification test samples shall consist of 50 feet *(125 m)* of black and white tubing. Qualification of black and white shall qualify all colors. Qualification of any size within each size range specified below shall qualify all sizes within that size range.

Size Range
3/64 through 1/8
3/16 through 3/4
1 through 4

4.2.2 Acceptance Test Samples

Acceptance test samples shall consist of not less than 16 feet *(5 m)* of tubing selected at random from each lot. A lot shall consist of all tubing of the same size, from the same production run, and offered for inspection at the same time.

4.3 TEST PROCEDURES

Unless otherwise specified, perform tests on specimens which have been fully recovered by conditioning for 3 minutes in a 200 ± 5°C *(392 ± 9°F)* oven. Condition the test specimens (and measurement gauges, when applicable) for 3 hours at 23 ± 3°C *(73 ± 5°F)* and 50 ± 5 percent relative humidity for 3 hours prior to all testing. Use mechanical convection type ovens in which air passes the specimens at a velocity of 100 to 200 feet *(30 to 60 m)* per minute.

4.3.1 Dimensions and Longitudinal Change

Measure three 6-inch *(150 mm)* specimens of tubing as supplied, for length ± 1/32 inch *(± 1 mm)*, and inside diameter in accordance with ASTM D 2671. Condition the specimens for 3 minutes in a 200 ± 5°C *(392 ± 9°F)* oven, cool to 23 ± 3°C *(73 + 5°F)*, and then remeasure. Prior to and after conditioning, the dimensions of the tubing shall be in accordance with Table 1 and the longitudinal change shall be in accordance with Table 3. Calculate the longitudinal change as follows:

$$C = \frac{L_1 - L_0}{L_0} \times 100$$

Where: C = Longitudinal Change [percent]
L_0 = Length Before Conditioning [inches *(mm)*]
L_1 = Length After Conditioning [inches *(mm)*]

4.3.2 Tensile Strength and Ultimate Elongation

Determine the tensile strength and ultimate elongation of the tubing in accordance with ASTM D 2671 using 1-inch *(25-mm)* bench marks, a 1-inch *(25-mm)* initial jaw separation, and jaw separation speed of 20 ± 2 inches *(500 ± 50 mm)* per minute.

4.3.3 Low Temperature Flexibility

Test three specimens of tubing for low temperature flexibility as follows: for tubing sizes 3/4-inch expanded and smaller, shrink and condition the tubing as specified in 4.3 onto a stranded AWG wire (nearest AWG which is larger than the tubing maximum I.D. nominal after unrestricted shrinkage). For tubing sizes larger than 3/4-inch, cut a 6 x 1/4-inch *(150 x 6-mm)* longitudinal strip from tubing that has been recovered. Condition the specimens and a mandrel, selected from Table 2, in a cold chamber for 4 hours at -55 ± 3°C *(-67 ± 5°F)*. After completion of the conditioning period and while still in the cold chamber at the specified temperature, bend the specimen around the mandrel through not less than 360 degrees in 10 ± 2 seconds. Visually examine the tubing for cracks.

4.4 REJECTION AND RETEST

Failure of any sample of tubing to conform to any one of the requirements of this specification shall be cause for rejection of the lot represented. Tubing which has been rejected may be replaced or reworked to correct the defect and then resubmitted for acceptance. Before resubmitting, full particulars concerning previous rejection and action taken to correct the defects shall be furnished to the inspector.

5. PREPARATION FOR DELIVERY

5.1 FORM

The tubing shall be supplied on spools, unless otherwise specified.

5.2 PACKAGING

Packaging shall be in accordance with good commercial practice.

5.3 MARKING

Each container of tubing shall be permanently and legibly marked with the size, quantity, manufacturer's identification, specification number, and lot number.

TABLE 1
