

8-PORT EN50155 GIGABIT POE ETHERNET SWITCH

1GBPS UNMANAGED ETHERNET SWITCH WITH POE AND 2X BYPASS

The 8-port EN50155 Gigabit Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway applications. The products are EN50155 compliant, unmanaged Ethernet switches with eight (8x) 10/100/500/1000Base-T(X) P.S.E. ports. The 8-port Ethernet POE switches use M12 connectors to guarantee reliable operation during tough environmental conditions, such as vibration and shock. The 8-port Gigabit POE ethernet switch includes 2 bypass ports that protect the network from failures by ensuring network integrity during power loss. The 5-port PoE switch also supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Furthermore they are provided with reversed polarity protection, overcurrent protection, redundant power inputs and broadcast storm protection
