Introduction

Product Features

- Direct Mating Connectors for PC Boards, 2–8 Positions, up to 6 A Current Carrying Capacity
- Indirect Mating Connectors, 1–8 Positions, up to 16 A Current Carrying Capacity
- Variable Keying
- Double Wire Termination possible

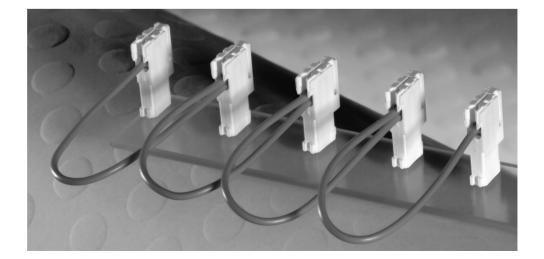

Tyco Electronics' newly designed AMP multifitting Mark II Connector System was developed according to the latest connector design standards.

The requirements of advanced In-Line mating technology for the components and contacts of pc boards are incorporated in the direct and indirect versions of these connector systems. This system is suitable for a wide wire size range. Current carrying capacity is 16 A maximum.

Double termination is possible with 0.5 and 0.5 $\rm mm^2$ or 0.5 and 0.75 $\rm mm^2$ conductors.

The connectors are available in 1- to 8-positions (indirect) resp. 2- to 8positions (direct) with an exterior locking device. Interior locking options are available on request.

Supplied in chain and provided with all keying and polarisation ribs, the connectors can be operated economically with modern Application Tooling Equipment.

AMP MONO-SHAPE Connectors in In-Line Mating Technology

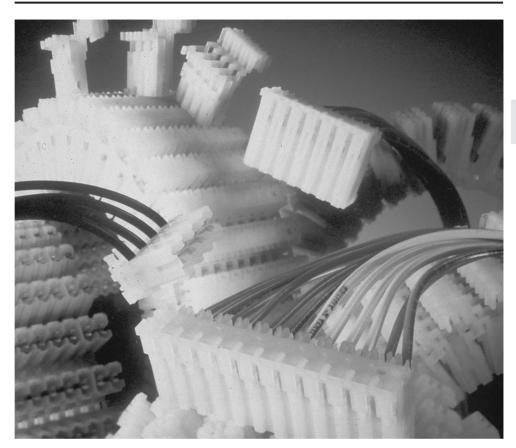

Introduction

AMP MONO-SHAPE Connectors in In-Line Mating Technology

AMP MONO-SHAPE connectors represent a valid solution to the ever-increasing requirements for production and application flexibility. They are high productivity, great flexibility, quality, minimum applied cost. AMP MONO-SHAPE productline includes a full range of 5.0 mm pitch modular connectors contents with similar outer shape, several variation in the mating area such as PC Board and 6.3 x 0.8 mm tabs (RAST 5), plus a version for harness shunts.

AMP MONO-SHAPE connection system adopts the IDC termination technology, which improves application results and quality level.

The AMP MONO-SHAPE product range, combined with the performances and properties offered by the termination system, allow to manufacture extremely complicated harness structures while still maintaining high production levels.

Technical Features

- IDC Connector system design to maximise the full integration with the application tooling assuring total flexibility in harness design.
- High current system, up to 16 Ampere, designed to satisfy several appliance requirements.
- ID Contact designed to accept standard discrete wires ranging from 0.5 up to 1.5 mm², according to the connector configuration.
- The connector incorporates modern in-line mating technology on a 5.0 mm centerline with no loss of spacing and a variety of keying possibilities.
- Wiring faults eliminated through high automation.
- Approvals: VDE: 4751-1431-4024 / A 10A and 4751-1431-4024 / A 9E

AMP MONO-SHAPE Connector Versions

Same Shape -Different Applications

With the same outside shape four connector versions are available, which are to handle with the same application tooling.

TAB Connectors

2–12 position 5.0 mm pitch connectors with insulation displacement contacts mateable with components according to RAST 5 and with tinned copper alloy tab 6.3 x 0.8 mm according to DIN 46244.

Single Way Connectors

Single Way connectors with insulation displacement contacts for use on tinned copper alloy tab 6.3 x 0.8 mm according to DIN 46244.

PCB Connectors

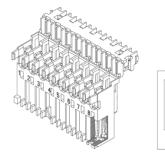

2-12 position 5.0 mm pitch connectors with insulation displacement contacts according to printed circuit boards with thickness 1.5 ± 0.2 mm and 5.0 mm pitch.

Satellite Connectors

3 position connectors, pitch 5.0 mm, with short circuited insulation displacement contacts for harness shunts. Wire Size Range: 0.5–1.5 mm²

Current Rating: 16 Ampere max. acc. to wire size

-For LIF version up to 10 Ampere max

LIF version 2 point contact instead of 4 as per standard version

Wire Size Range:

Wire Size Range:

0.5-0.75 mm²

Current Rating:

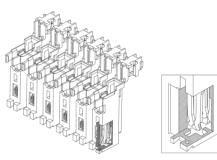

PC Board:

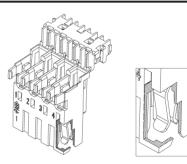

0.5–1.5 mm² **Current Rating:** 16 Ampere max. acc. to wire size

Supply Status: In order to increase productivity these items are supplied in sticks.

6 Ampere max. acc. to wire size

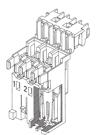

Single or both sides printed 5 µm tin over 35 µm copper

Wire Size Range: 0.5–1.5 mm²

Current Rating: 16 Ampère max. acc. to wire size

AMP MONO-SHAPE Single Way Connector

Single Way Connector

- 1 All Single Way Connectors are supplied in "stick-form" by 6 single ways each. They will be cut from the Application Tooling Machines
- 2 Cover closed after Wire Insertion. Wire Direction 90°. 180° when locked in Cover Recess
- **3** Polarisation similar to the keying of the front side
- 4 Keying
- 5 Plastic Noses which Lock into the TAB Hole
- 6 Colour Marking

Technical Features

Centerline:

5.0 mm, according to RAST 5 specifications

Configurations: 1 position

Housing Material: Plastic PA 6.6

Housing Colour: Natural colour

Contact Material: Copper alloy, post-tinned 2.0 µm min.

Polarisation, Keying, Locking Latches: according to RAST 5 specifications (see customer drawings)

Track Resistance: as per IEC 112 (250 V)

Glow Wire Test: as per IEC 695-2-1 (850 °C) and 750°C no flame

Air and Creepage Distance: according to EN 60998-1 (IEC 998-1) for 380 V, \geq 4.0 mm Voltage Resistance: according to EN 60998-1 (IEC 998-1) 1750 V for 4 minutes

Insulation Resistance: according to EN 60998-1 (IEC 998-1) >5 M Ω

Wire Size Range: from 0.5 to 1.5 mm²

 $\begin{array}{l} \mbox{Current Rating:}\\ 16 \mbox{ A max. according to wire}\\ size\\ 0.5 \mbox{ mm}^2 \leq \!\! 3 \mbox{ A, } 0.75 \mbox{ mm}^2 \leq \!\! 6 \mbox{ A, }\\ 1.0 \mbox{ mm}^2 \leq \!\! 10 \mbox{ A, } 1.5 \mbox{ mm}^2 \leq \!\! 16 \mbox{ A} \end{array}$

Rated Voltage: 380 Volts max.

Wire Type: H05V-K (70 °C max.) or FR 3/2 (105 °C max.) for 0.5–1.0 mm² wires with copper or tinned stranded wires H07V-K (70 °C max.) or FR 3/2 (105 °C max.) for wires from 1.5mm² with copper or tinned stranded wires Insulation Type:

PVC suitable for temperatures up to 70 °C / 105 °C

Insulation Diameter Range: 2.0–3.5 mm

Temperature Range: -25 °C up to +105 °C

Wire Extraction Force/Way: 50 N min. on wire size 0.5 mm²

Application Specification: 114-20017

Product Specification: 108-20066

Homologations: acc.to VDE File No. 3905 (to 16 A) and UL File No. E28476 (to 14 A)

Counter Part: Tab 6.3 x 0.8 mm as per DIN 46244 norms

Materials: Copper alloy

Finishing: Tinned (6.0 µm max.)

Rast 5

Introduction

AMP MONO-SHAPE MARK II Connectors in In-Line Mating Technology

MONO-SHAPE Mark II Connector System was developed according to the newest level of knowledge and standard.

The requirements of advanced In-Line mating technology for the component and contact of printed circuit board (PCB) is granted by the two versions TAB and PCB connector systems.

System is designed to maximise the full integration with the application tooling, assuring the flexibility in the harness design.

This system is suitable for a wide wire size range of conductor and current carrying capacity up to 16 A.

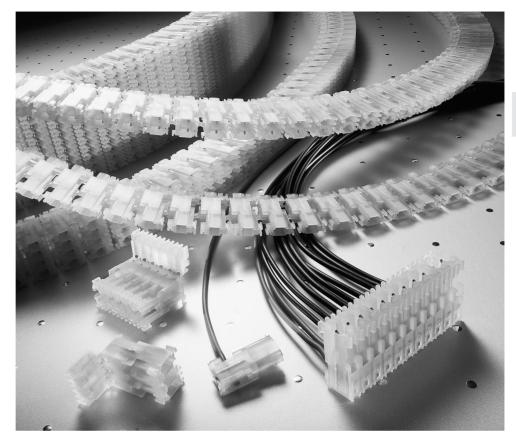

Double termination is possible with 0.5 and 0.5mm² or 0.5 and 0.75mm² conductors. (See application spec. 114-20104 for details)

The connectors are available in 1 to 10 positions (TAB Version) with interior locking device and 2 to 12 positions (PCB Version)

Connectors are supplied in chain and provided with all keying and polarisation ribs the connectors can be handled automatically with a modern Application Tooling Equipment.

Wiring faults checked and eliminated through high automation.

Application Machines shall provide to print a colour code mark on the connectors cover after wire termination, feasible on all connectors configuration, for connector identification on harnesses.

Technical Features

- Housing moulded in different materials for different applications
- Standard, Part Numbers with pre-dash 0 (as 0-284471-1) Housing in unfilled PA 6/6, UL 94V-2
- For UL94V0, Part Numbers with pre-dash 1 (as 1-284471-1) Housing in unfilled PA 6/6, UL 94V-0
- High Operating Temperature (up to 130°), Part Numbers with pre-dash 2 (as 2-284471-1) Unfilled PA 4/6, UL 94V-2 (available for TAB Version only)
- Glow Wire 750° no flame, Part Numbers with pre-dash 3 (as 3-284471-1) Housing in unfilled PA 6, UL 94V-2

Dimensions are shown for reference purposes only. Conversion Rate: 25.4mm = 1 inch Dimensions are in inches and millimetres unless otherwise specified. Values in brackets are metric equivalents Downloaded From Oneyac.com

Specifications subject to change.

Technical Data

Centerline: 5.0mm

Housing Material: Polyamide, PA 6.6 and PA 6

Approvals: VDE, UL CSA applied **Standard Colour:** Natural

Current Voltage: 250 V≃

Air and Creepage Distance: >3.2mm

Flammability Rating: According UL 94 V-2

TAB Connectors

1-10 position 5.0 pitch connectors with insulation displacement contacts mateable with components according to rast 5 and with tinned copper alloy tab contacts 6.3 x 0.8mm according to DIN 46244 and DIN 17670 Part 1.

TAB-BRIDGE Connectors

Same design as TAB Connectors but with a bridge between two adjacent contacts to have a Short Circuit between them.

Wire Size Range: 0.35-1.5 mm² **Current Rating:** 16 Ampere max. acc. to wire size used

PCB Connectors

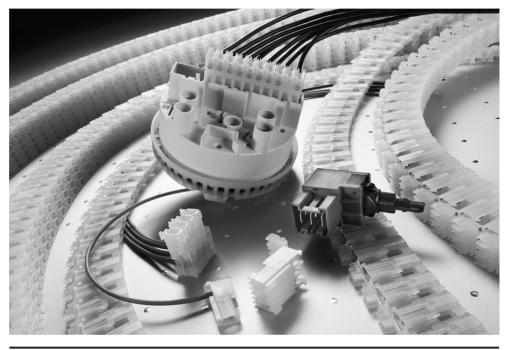

2-12 position 5.0 mm pitch connectors with insulation displacement contacts mateable with printed circuit boards (PCB)

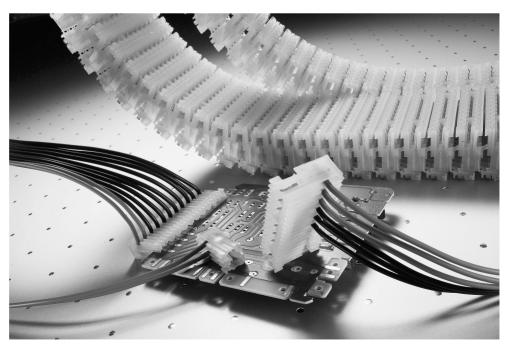

Wire Size Range: 0.35-0.75 mm²

Current Rating: 6 Ampere max. acc. to wire size used

PC Board:

Single or double side, with thickness 1.6±0.2mm, FR4, 2 x 0.35 µm Copper 5µm tinned tracks, 5.0mm pitch

Application Tooling

Entry Level Semi-Automatic **IDC Bench Machines**

SIM 500P Part No. 528376-2

SIM 500T Part No. 528377-2 In the Entry Level concept, the application process is shared by two different semi-automatic machines.

The SIM 500P prepares the AMP multifitting Mark II bandoliered IDC connectors. The machine removes the connector from the chain and cuts the keving ribs.

Next, the prepared IDC connectors are applied by the SIM 500T.

To facilitate this, the individual IDC connectors are loaded into a nest and moved automatically into the termination station.

The manually inserted wires are, according to a program, terminated into the appropriate

The nest, including the finished

SIM 500P

Technical Features

- Processing of all versions of the AMP multifitting Mark II connector system with only minor set up changes.
- Cutting and reliable removal of the reel clips.
- Cutting and reliable removal of the coding and polarisation ribs by means of a preset cutting block.

Nest capacity per machine cycle

- one connector 4- to 8-pos.
- two connectors 2- and 3-pos.
- four connectors 1-position
- Integrated monitoring of the connector supply.
- Simple operator interface.

Products for Industrial & **Commercial Applications**

Application Tooling (continued)

IDC Workstation – SIM 50

This semi-automatic machine was designed for the sequential processing of AMP multifitting Mark II IDC connector system and its variations such as direct and indirect mating connector with interior or exterior locking.

A processing sequence can consist of one or more IDC connectors of the same or different numbers of positions, but a maximum total of 12 positions.

The specific key coding of the connectors is performed during the termination process by an integrated cutting device.

The wires are manually fed into the machine and then automatically terminated.

Integrated control tests ensure a high quality product.

Technical Features

- Processing of all versions of the AMP multifitting Mark II connector system without additional set up time.
- Termination of the wire with active support of the IDC contact.
- Termination of two wires in the same slot is programmable.
- Colour coding on the connector cover possible.
- Wire exit angle can be bent 180°.
- Short set up and changeover times.
- High output.
- Correct wire insertion length and key codings are continually checked.
- Good / bad sorter; faulty connections will be destroyed.

- 50 different production programs can be stored.
- Operator PC interface displaying machine status and production data; different languages available.
- Low maintenance costs and the capability of off-site troubleshooting via modem.
- Ergonomic and easy to operate through a Touch Screen Display.

Technical Data

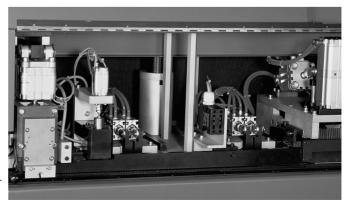

Power Supply: 230 V AC, 50 Hz

Air Pressure: 6 bar

Wire Size Range: 0.35 mm² up to 1.5 mm²

Insulation Diameter Range: 1.2 mm up to 3.0 mm

Wire Type: Stranded conductors

Processing Modules of the SIM 50

Application Tooling (continued)

Flexible Harness Maker – FHM

The FHM is a fully-automatic machine featuring modular set up. It is built to manufacture harnesses by processing both IDC connectors and crimp terminals.

The basic machine includes a 12 wire selector, a station that cuts the wires to length, a stripping station, a doublecrimp unit, two crimping presses and wire end ejector for doubling and daisy chains.

A gripper unit takes the wire from the base machine and transfers it to the attached IDC station. Sequential processing allows the manufacturing of cross-overs and bridges as well as double-crimps, depending on the type of IDC connector used.

The IDC workstations are easily reconfigured for processing our different IDC connector systems. They include all the necessary processing operations for IDC termination with minimum change-over and set up times.

Quality checks integrated in the manufacturing process ensure the highest quality harness for every production run.

Technical Features

- Manufacturing of harnesses with 2.5 mm pitch IDC connectors and/or 5.0 mm pitch IDC connectors and/or with crimp terminals.
- IDC Workstations are available for the following connector systems:
 - AMP DUOPLUG 2.5
 - AMP DUOPLUG 2.5
 Mark II
 - AMP DUOPLUG Power
 - AMP multifitting Mark II
 - AMP MONO-SHAPE
 Mark II
- The IDC Workstations can also be used as separate semi-automatic machines with manual wire transfer.
- The specific key coding of the IDC connector is done on the IDC Workstation.

- Integrated test equipment checks the coding and the insertion depth of the wire, and performs a continuity test. A spark testing unit is also available as an option.
- Wire printing and single housing insertion possible.
- Operator PC interface displays machine status and production data; different languages available.
- Low maintenance costs and the capability of off-site troubleshooting via modem.
- Ergonomic and easy to operate through a Touch Screen Display.

Technical Data

Power Supply: 400 V AC, 50 Hz

Air Pressure: 6 bar

Wire Size Range: 0.22 mm² up to 1.5 mm²

Wire Length: 220 mm up to 2,500 mm

Insulation Diameter Range: 1.2 mm up to 3.0 mm

Wire Type: Stranded conductors

Rast

Application Tooling (continued)

IDC Harness Maker – IHM Mark III

The new IHM Mark III is a very high performance, fullyautomatic machine designed to manufacture parallel jumper harnesses using IDC technology.

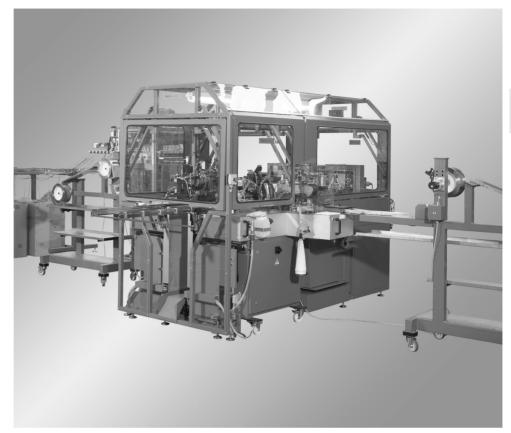

The simultaneous feeding of up to 21 wires guarantees high productivity and flexibility and a choice of 2.5 mm or 5.0 mm pitch IDC systems.

The gripper unit on the left side of the machine is able to spread the wires in both directions to enable the production of harnesses using both 2.5 mm and 5.0 mm pitch connectors at the same time.

Available options are a stripper crimper unit with an integrated crimp force analyser and a good/bad sorting unit.

The IDC workstations are easily reconfigured for processing our different IDC connector systems. They include all the necessary processing operations for IDC termination with minimum change-over and set up times.

Quality checks integrated in the manufacturing process ensure the highest quality harness for every production run.

Technical Features

- Manufacturing of harnesses using 2.5 mm and/or 5.0 mm pitch IDC systems.
- Very short wire length is possible.
- Option available to produce harnesses with crimp terminals on one side.
- IDC Workstations are available for the following connector systems:
 - AMP DUOPLUG 2.5
 - AMP DUOPLUG 2.5 Mark II
 - AMP DUOPLUG Power
 - AMP multifitting Mark II
 - AMP MONO-SHAPE Mark II
 - AMP MT Edge

- The specific key coding of the IDC connector is done on the IDC Workstation.
- Integrated test equipment checks the coding and the insertion depth of the wire, and performs a continuity test. A spark testing unit is also available as an option.
- Operator PC interface displays machine status and production data; different languages available.
- Low maintenance costs and the capability of off-site troubleshooting via modem.
- Ergonomic and easy to operate through a Touch Screen Display.

Technical Data

Power Supply: 400 V AC, 50 Hz

Air Pressure: 6 bar

Wire Size Range: 0.22 mm² up to 1.5 mm²

Wire Length: 125 mm up to 2,200 mm

Insulation Diameter Range: 1.2 mm up to 3.0 mm

Introduction

AMP Standard Timer Connectors in In-Line Mating Technology

AMP Standard Timer connectors according to RAST 5.0 mm standard have been developed to connect RAST 5 components (like motors, leach pumps, water level regulators, relays and push-button switches) in the Household Appliances Industry.

They meet industry requirements, for example multiple position connectors, secure connection even at inclining mating as well as a sturdy contact design.

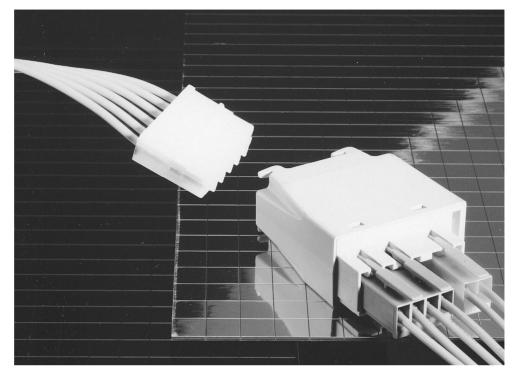

AMP Standard Power Timer contacts, for use with Standard Timer housings, are suitable for high density and high current capacity up to 16 A.

Housing is designed for end-to-end stacking without contact loss. They are available in different keying and locking versions from 2- positions to 12-positions.

Standard Timer contacts can be used with stranded wires from 0.5 mm² to 2.5 mm² and can be double terminated. Of course, the corresponding tooling is available, too.

AMP Standard Timer connectors are tested by VDE and fulfil all requirements acc. to VDE 0700 (air gap, creepage distance, glow wire test, ball pressure test, creepage current strength).

UL recognised component.

Technical Features

Centerline: 5.0 mm Available Number of Positions: 2- to 12-positions

Housing Material: Polyamide PA 6.6 Contact Material:

CuSn, CuFe

Contact Finish: Tin Plated, Silver Plated

Wire Size Range: from 0.5 to 2.5mm²

Wire Size Diameter: from 2.0 to 3.3mm

Temperature Range: -40°C to +110°C

Current Voltage: 220 V≂

Current Rating: max. 16 A Standard Timer: 6 A Power Timer: 16 A Mating Force Contact: < 15 N Unmating Force: ≤ 8 N Air and Creepage Distance: ≥ 3.0mm Track Resistance: PTI 250 Glow Wire Test: 850°C **Contacts made for Tabs according:-**DIN 46244 (6.3 x 0.8mm / 4.8 x 0.8mm) DIN 46343 Part 2 and 3
