QUAD 2 – INPUT SCHMITT NAND GATE

(Note) The JEDEC SOP (FN) is not available in Japan.

The TC74HC132A is a high speed CMOS 2-INPUT NAND SCHMITT TRIGGER GATE fabricated with silicon gate C^2MOS technology.
It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.
Pin configuration and function are the same as the TC74HC00A but the inputs have 25% V_{CC} hysteresis and with its schmitt trigger inputs, the TC74HC132A can be used as a line receiver for slow input signals.
All inputs are equipped with protection circuits against static discharge or transient excess voltage.
