## LINEAR INTEGRATED CIRCUIT

### 3A ADJUSTABLE/FIXED LOW DROPOUT LINEAR REGULATOR

#### DESCRIPTION

The UTC **UZ1085-xx** series are low dropout three-terminal regulators with 3A output current capability. These devices have been optimized for low voltage applications including VTT bus termination, where transient response and minimum input voltage are critical.

Current limit is trimmed to ensure specified output current and controlled short-circuit current. On-chip thermal limiting provides protection against any combination of overload and ambient temperature that would create excessive junction temperatures.

#### FEATURES

- \*Fast transient response
- \*Low dropout voltage at up to 3A
- \*Load regulation:0.05% typical
- \*Trimmed current limit
- \*On-chip thermal limiting
