**Multilayer Ceramic Capacitors**

**1. INTRODUCTION**

MLCC consists of a conducting material and electrodes. To manufacture a chip-type SMT and achieve miniaturization, high density and high efficiency, ceramic condensers are used.

01R5 MLCC is performed by high precision technology achieve high capacitance in unit size and ensure the stability and reliability of products.

**2. FEATURES**

- a. High capacitance in unit size.
- b. High precision dimensional tolerances.
- c. Suitable used in high-accuracy automatic mounting machine.

**3. APPLICATIONS**

- a. Miniature microwave module.
- b. Portable equipments (ex. Mobile phone, PDA).
- c. High frequency circuits.

\* Measured at 30~70% related humidity.

NP0: Apply 0.5~5Vrms, 1.0MHz±10% at the condition of 25°C ambient temperature.

X7R: Apply 1.0±0.2Vrms, 1.0kHz±10%, at 25°C ambient temperature.

X5R: Apply 0.5±0.2Vrms or 1.0±0.2Vrms<sup>#1</sup>, 1.0kHz±10%, at the condition of 25°C ambient temperature.

\*\* Preconditioning for Class II MLCC: Perform a heat treatment at 150±10°C for 1 hour, then leave in a mbient condition for 24±2 hours before measurement.

②	Inner electrode	Ni	
③	Termination	Inner layer	Cu
④		Middle layer	Ni

**Storage and handling conditions**

- (1) To store products at 5 to 40°C ambient temperature and 20 to 70% related humidity conditions; MSL Level 1.
- (2) The product is recommended to be used within one year after shipment. Check solderability in case of shelf life extension is needed.

Cautions:

- a. The corrosive gas reacts on the terminal electrodes of capacitors, and results in the poor solderability. Do not store the capacitors in the ambience of corrosive gas (e.g., hydrogen sulfide, sulfur dioxide, chlorine, ammonia gas etc.)
- b. In corrosive atmosphere, solderability might be degraded, and silver migration might occur to cause low reliability.
- c. Due to the dewing by rapid humidity change, or the photochemical change of the terminal electrode by direct sunlight, the solderability and electrical performance may deteriorate. Do not store capacitors under direct sunlight or dewing condition. To store products on the shelf and avoid exposure to moisture.

**Recommended soldering conditions**

The lead-free termination MLCCs are not only to be used on SMT against lead-free solder paste, but also suitable against lead-containing solder paste. If the optimized solder joint is requested, increasing soldering time, temperature and concentration of N<sub>2</sub> within oven are recommended.
