

# HiRel NPN Silicon RF Transistor

- HiRel Discrete and Microwave Semiconductor
- For low noise, high-gain amplifiers up to 2GHz.
- For linear broadband amplifiers
- Specified 1/f Noise
- Hermetically sealed microwave package
- f<sub>T</sub>= 8 GHz
  F = 2.3 dB at 2 GHz
- CSA Space Qualified ESA/SCC Detail Spec. No.: 5611/006 Type Variant No. 08

**ESD**: Electrostatic discharge sensitive device, observe handling precautions!

### **Maximum Ratings**

| Parameter  | Symbol           | Values           | Unit |  |
|--|------------------|------------------|------|--|
| Collector-emitter voltage                                  | V <sub>CEO</sub> | 12               | V    |  |
| Collector-emitter voltage, $V_{BE}=0$                      | V <sub>CES</sub> | 20               | V    |  |
| Collector-base voltage                                     | V <sub>CBO</sub> | 20               | V    |  |
| Emitter-base voltage                                       | V <sub>EBO</sub> | 2                | V    |  |
| Collector current  | Ι <sub>C</sub>   | 80               | mA   |  |
| Base current   | I <sub>B</sub>   | 10 <sup>1)</sup> | mA   |  |
| Total power dissipation, $T_S \leq 104^{\circ}C^{-2), 3)}$ | P <sub>tot</sub> | 580              | mW   |  |
| Junction temperature                                       | Tj               | 200              | °C   |  |
| Operating temperature range                                | T <sub>op</sub>  | -65+200          | °C   |  |
| Storage temperature range                                  | T <sub>stg</sub> | -65+200          | °C   |  |
|  | - sig            |                  |      |  |

### **Thermal Resistance**

| Junction-soldering point <sup>3)</sup> | $R_{thJS}$ | < 165 | K/W |
|--|------------|-------|-----|
| Notoo                                  |            |       |     |

#### <u>Notes.:</u>

1) The maximum permissible base current for  $V_{FBE}$  measurements is 30mA (spotmeasurement duration < 1s)

2) At  $T_s = +104$  °C. For  $T_s > +104$  °C derating is required. 3)  $T_s$  is measured on the collector lead at the soldering point to the pcb.

### **Electrical Characteristics**

at T<sub>A</sub>=25°C; unless otherwise specified

| Parameter | Symbol |      | Values |      | Unit |
|-----------|--------|------|--------|------|------|

### Attention please!

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics ("Beschaffenheitsgarantie"). With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation warranties of non-infringement of intellectual property rights of an third party.

### Information

For further information on technology, delivery terms and conditions and prices please contact your nearest Infineon Technologies Office (<u>www.infineon.com</u>).

### Warnings

Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies Office.

Infineon Technologies Components may only be used in life-support devices or systems with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety or effectiveness of that device or system.

Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
