Audio Algorithms

- MaxxBass[®]
 - Patented Waves MaxxBass psycho-acoustic bass extension delivers a more natural sound than traditional bass boost technologies, which use EQ and can overpower your system. MaxxBass analyzes low frequencies to create harmonics that are perceived as lower, deeper tones.
- Maxx3D
 - Maxx3D extends the span of stereo-side content while maintaining the integrity of unprocessed center content
 - Maxx3D improves the stereo separation of speakers, widening the stereo field for optimal imaging.
- MaxxTreble
 - MaxxTreble delivers crystal clear high-frequency enhancement for increased RMS without exceeding the system ceiling. Its proprietary algorithm restores luster to over-compressed formats to provide the perfect listening experience.
- MaxxEQ
 - MaxxEQ provides the ability to design EQ curves and shape sound with surgical precision, using up to 20 programmable filters with bell, shelf, low pass, and high pass, plus adjustable frequency, gain, and Q parameters. MaxxEQ's intuitive Graphic User Interface makes click-and-drag filter design fast and easy.
- MaxxVolume[®]
 - MaxxVolume is an all-in-one volume control, with High-Level Compression to increase RMS levels, Low-Level Compression to increase the clarity of soft sounds, Noise Gating to eliminate signal and system noise, and Leveling to smooth out volume levels.

It includes:

- □ Leveler (replaces traditional AGC)
- Low-level gain
- Dynamic range curve controller
- Noise gate

- MaxxLeveler
 - MaxxLeveler regulates the perceived volume of the audio, keeping all audio content at the same level.
- MaxxDialog
 - MaxxDialog is a revolutionary new technology that enables users to adjust center channel dialog levels without affecting the rest of the audio mix. Based on the Waves Center pro audio plug-in, MaxxDialog delivers clear, crisp dialog that does not disappear behind loud music and effects.
- Sub-Woofer
 - Enables separating low-frequency content and directing it into a third audio channel, for driving a subwoofer.

Power Amplifier

- Class-D Power up to 2 x 20W to 6 Ω or 8 Ω (0.5% THD)
- 2.1 way power output up to 2 x 10W + 20W (internal generation of sub-woofer)
- Typical power efficiency of 90%
- 100 dB SNR
- Less than 0.4% THD at 1W
- Protection:
 - Over-current
 - Under-voltage
 - Over-temperature
