1.Scope

These specifications apply to QUARTZ CRYSTAL RESONATORS (hereinafter referred to as RESONATORS) to be manufactured by Seiko Instruments Inc. (hereinafter referred to as <u>SII</u>) to

2.Designation

RESONATORS are designated "VT-200-F" (32.768kHz).

3.Shape and dimensions

As per the VT-200-F drawing shown on page 5.

4.Electrical characteristics

Specified on page 2 through 3.

5. Shipment and packaging

5.1 (10,000) pcs are the standard lot size to which the lot number shall be allotted 5.2 The packaging shall conform to the resonator packaging standards.

6.Outgoing inspection

- 6.1 When mutually agreed, the outgoing inspection shall be conducted as per the standard on page 4.
- 6.2 The outgoing inspection slip is not basically affixed to each packaging.

7.Warranty

| In the event that any defective RESON | ATORS or defective lot is found at |
|---|-------------------------------------|
| incoming inspection at | and that any defect |
| resulting from failures in process-control | at SII after incoming inspection is |
| found, good RESONATORS shall be su | pplied to |
| free of charge as a replacement. | |
| In the event that any trouble or problem | is rising directly from RESONATORS |
| occurs, it will be amicably settled between | en both parties, provided that |
| warranty shall be done within the score | of replacement of good RESONATORS. |

8.Amendment or abolition of the specifications.

| Amendment or abolition of the specification | ons shall be made upon mutual |
|---|-----------------------------------|
| consent between | _and SII .If any problem arises , |
| it shall be amicably settled between both | parties. |

9.Effectiveness of the specifications

These specifications are effective after receipt of returned copies with your approved sign.

10.Others

RoHS compliant

These products use Pb in high melting temperature type solders exempted by RoHS directive.

Note:

- 1. The adove tests no. 1 to 9 must be conducted independently (not series tests)
- 2. *1: Measure after 24 hours soak at room temperature .
- 3. *2: Measure after 2 hours soak at room temperature .
- 4. R1 is $60k\Omega$ max. after the each above tests.

[5] Precautions

(1) Temperature for soldering the lead wire shall not exceed 300 and the soldering time shall be within 5 seconds.

(2) Position to be soldered: Solder only the position where the lead wire is

1.0mm away from the glass seal.

Do not solder the case.

(3) Cutting, bending and

correction of lead wire: The glass seal shall be free of any crack or other

damage which may deteriorate the characteristics

of RESONATORS.

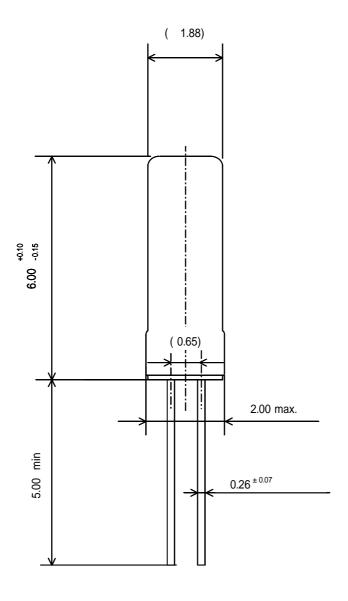

[6] Outgoing inspection standard

·The outgoing inspection shall be conducted as per the following standard .

·The sampling shall be performed according to the ANSI/ASQCZ1.4-1996 .
